

The Royal Horticultural Society

Registered charity no: 222879/SC038262

Award of Garden Merit Vegetables 2007

with descriptions drawn up by the Vegetable Trials Sub-Committee

30 September 2007

Key:

H1—requires heated glass H2—requires unheated glass H3—hardy outside in some regions; needs frost-free protection in winter H4—hardy throughout the British Isles

Figures (e.g. 99) to the left of names give the year of the award. Figures after the hardiness rating (e.g. 1-2-4) relate to availability in seed catalogues. Figures in bold (e.g. 1-12-14) relate to organic seed. For key to suppliers turn to back page.

ASPARAGUS (*Asparagus officinalis*)

- 01 **'Backlim'** (H4) 8-12
~ F1 hybrid; consistently high yield of large spears
- 93 **'Connover's Colossal'** (H4) 1-2-5-10-12-13-14-18-20-21-25-30-31
~ AGM awarded to Sore's maintenance only. Early; heavy yield of good quality spears. Reconfirmed after trial 2001
- 01 **'Gijnlim'** (H4) 1-9-30 35
~ F1 hybrid; early. Consistently high yield of mid-green spears with purple tips
- 93 **'Lucullus'** (H4)
~ F1 hybrid; later cropping. Good yield of medium-sized spears

AUBERGINE (*Solanum melongena*)

- 95 **'Adona'** (H2)
~ F1 hybrid. High yield of large shiny purple fruit
- 95 **'Bonica'** (H2) 1-6-26
~ F1 hybrid. Very large, bulbous, shiny purple fruit. Excellent cropper
- 93 **'Galine'** (H2) 1
~ F1 hybrid. Very large, round, shiny fruit
- 95 **'Mohican'** (H2) 1-6-9-10
~ F1 hybrid. Compact habit with bulbous white shiny fruit
- 93 **'Rima'** (H2)
~ F1 hybrid. High yield of large, typically bulbous, shiny purple fruit
- 95 **'Vernal'** (H2)
~ F1 hybrid. Long, bulbous, shiny fruit

BEANS

Broad, November or spring sown (*Vicia faba*)

- 93 **'Aquadulce Claudia'** (H4) 1-2-4-5-6-8-9-10-12-20-21-22-30-32 9
~ not too tall; a good compact plant. An early crop when spring sown. Reconfirmed after trial 1999
- 95 **'Topic'** (H3-4) 14
~ early maturing; good yield. Reconfirmed after trial 1999
- 93 **'Witkiem Major'** (H3-4)
~ a good early yield, with uniform pods; plants not too tall. Reconfirmed after trial 1999

Broad bean, November sown (*Vicia faba*)

- 95 **'Aquadulce'** (H4) 1-7
~ dark green foliage, showing some variability. Long pods; the highest yielding in the trial
- 95 **'Aquadulce Loretta'** (H4)
~ uniform plants with long pods
- 93 **'Express'** (H3-4) 1-5-6-8-10-12-15-20-21-30 19-31
~ quick maturing, with well-filled pods
- 93 **'Imperial Green Longpod'** (H3-4) 1-3-6-7-10-12-22-26-32
~ good green colour and flavour; particularly good for freezing. Reconfirmed after trial 1999

Broad bean, spring sown (*Vicia faba*)

- 99 **'Jubilee Hysor'** (H3-4) 1-3-8-10-12-20-21
~ good yield; uniform, well-filled pods
- 99 **'Masterpiece Green Longpod'** (H3-4) 1-2-3-5-7-9-11-14-15-20-21-25-30
~ slender, well-filled pods; good green colour and flavour; suitable for freezing
- 99 **'Medes'** (H3-4) 10
~ high yield of uniform, good-sized pods
- 93 **'Meteor'** (H3-4) 8
~ an early crop with well-filled, even pods; good flavour. Reconfirmed after trial 1999
- 93 **'The Sutton'** (H3-4) 1-2-3-5-6-7-8-9-10-12-13-14-15-20-21-22-25-30-31
~ dwarf compact plants, with nice flavour; ideal for smaller gardens and windy situations. Reconfirmed after trial 1999

- 99 **'Witkiem Manita'** (H3-4)
1-2-3-4-7-9-14-15-20-21 12
~ a good early yield, with uniform pods

- 93 **'Witkiem Vroma'** (H3-4) 7
~ early cropping with medium-length, well-filled pods

Climbing French bean (*Phaseolus vulgaris*)

- 93 **'Algarve'** (flat) (H3) 6-8
~ high yield; uniform mid-green stringless pods. Reconfirmed after trial 2000
- 00 **'Cobra'** (PBR) (round) (H3) 1-3-4-6-7-8-9-10-14-20-21-22-32-34 13-17-31
~ very high early yield; long, fleshy; very attractive
- 93 **'Cunera'** (round) (H3)
~ mid-green stringless pods
- 93 **'Diamant'** (round) (H3) 14
~ stringless pods
- 00 **'Emerite'** (round) (H3)
~ a medium to high yield of uniform, medium to long, slightly curved, fleshy, attractive beans

- 93 **'Eva'** (round) (H3) 5-12-13-17-31
~ very early. Long straight fleshy pods, wider-podded than other round varieties. Reconfirmed after trial 2000

- 93 **'Hunter'** (flat) (H3) 1-2-4-5-7-14-15-18-20-22-21-30 19
~ attractive long stringless pods. Slow to show seed development. Reconfirmed after trial 2000

- 00 **'Kingston Gold'** (flat) (H3) 18
~ attractive smooth, yellow pod; uniform, slow-maturing, green-podded beans

- 93 **'Kwintus'** (flat) (H3)
~ high yield with long stringless pods

- 93 **'Musica'** (flat) (H3)
~ quick to mature, with long stringless pods

- 00 **'Sultana'** (round) (H3) 7-11
~ early, attractive French bean type. Medium to high yield of very uniform, medium to long, mid-green, reasonably fleshy beans. Does not seed too quickly
- Dwarf French bean (*Phaseolus vulgaris*)**
- 93 **'Annabel'** (H3) 1-4-20-21
~ slightly curved green pods, held high in the plant; upright habit. Reconfirmed after trial 1996
- 96 **'Artigo'** (H3)
~ strong-growing with high yield of large long green pods
- 02 **'Berggold'** (wax podded) (H3)
~ attractive, clear golden, medium to long beans with slightly curved and flattened pods
- 01 **'Cantare'** (PBR) (H3) 1-14 **13-14-17-31-35**
~ medium length, fleshy, good taste
- 93 **'Cropper Teepee'** (H3) 1-4-15-18-20-21
~ upright habit. Mid-green large pods, held high in the plant. Reconfirmed after trial 1996
- 93 **'Delinel'** (H3) 7-8-10
~ strong-growing with long, dark green pods. Reconfirmed after trial 2001
- 96 **'Ferrari'** (H3) 6-7-27
~ high yield; compact habit with straight, shortish, dark green pods
- 01 **'Filao'** (H3)
~ a short, fine, good quality bean
- 02 **'Golddukat'** (wax podded) (H3) 8
~ very early; high yield of pale yellow beans with some greening. Slightly curved and flattened pods
- 96 **'Trago'** (H3) 26
~ very early; high yield. Upright habit; long, straight, mid-green pods held high in the plant. Reconfirmed after trial 2001
- 01 **'Jessica'** (H3)
~ medium length, fleshy, attractive beans with a good flavour. Potentially high yield
- 01 **'Maja'** (H3) **19**
~ long, fat, good for slicing; the highest yield in the trial
- 01 **'Maradonna'** (H3) 6
~ medium to short, mid-green, flattish pods
- 01 **'Marona'** (H3)
~ late; medium length, dark green, fat pods; good potential yield
- 01 **'Nomad'** (H3) 10
~ medium to short, fairly pale, uniform, straight, slightly flattened pods. High yield
- 02 **'Orinoco'** (wax podded) (H3) 1-4-7-15
~ medium yield of medium to long, rounded, straight, slim, greenish-yellow pods
- 01 **'Safari'** (H3) 1-4-7-8-9-15-20-21-22-23-31
~ short, slim, mid-green, round, attractive pods. Low yields
- 02 **'Sonesta'** (wax podded) (H3) 1-10-11-14-15
~ early. High yield of bright yellow, fairly long, straight, slightly flattened pods. A compact plant
- 93 **'Sprite'** (H3) 1-9-14-20-21-22-30
~ heavy yield, with long, dark green pods
- 96 **'The Prince'** (H3) 1-2-5-8-9-10-12-14-15-20-21-22-25-26
~ AGM awarded to Suttons maintenance only. Excellent yield; straight pale green pods
- Runner bean (*Phaseolus coccineus*)**
- 93 **'Achievement'** (H3) 1-14-15
~ maincrop with long, smooth, slender pods
- 99 **'Achievement-Merit'** (H3) 1-10
~ very long, straight, slender, smooth pods
- 06 **'Aintree'** (H3) 1-8-14-16-32
~ mid-season. Red-flowered, producing attractive, good quality, slim, straight, long pods with sweet flavour
- 06 **'Celebration'** (H3) 4-6-9
~ high yield of attractive, straight, smooth, good quality, fleshy pods with good colour and flavour. Flowers are a decorative pink
- 99 **'Desiree'** (H3) 1-2-3-4-8-10-12-14-20-21-31-19
~ stringless pods with thick fleshy walls
- 99 **'Enorma'** (H3) 1-2-4-6-7-8-9-10-11-14-15-20-21-22-30-32 **13-14-15-17-20-21-30-31**
~ late; long, smooth, slender pods
- 99 **'Flare'** (H3) 8
~ attractive slender pods; high yield
- 99 **'Lady Di'** (H3) 1-4-7-9-10-14-15-20-21-26
~ attractive, blemish-free, long, slender pods
- 93 **'Liberty'** (H3) 1-2-14-15-18-20-21-30
~ very long pods; a popular show variety
- 06 **'Red Flame'** (H3) 1-12-14-15-23
~ red-flowered, setting well with smooth, long, straight pods
- 99 **'Red Rum'** (H3)
1-4-6-7-8-10-11-14-20-21-30-32
~ good early and late yield; slim, straight, stringless pods, of medium length
- 99 **'Rotblühende'** (H3) 10 **10**
~ broad pods, fairly straight and smooth; good yield
- 99 **'Titan'** (H3)
~ long, straight, slender pods; good yield
- 99 **'White Apollo'** (H3) 3-9-16
~ long, smooth, fleshy pods; excellent early and late yield
- 99 **'White Emergo'** (H3) 1-5-14-20-21-30-**12-13-14-17-31**
~ late; smooth, tender, uniform pods, with good colour
- 06 **'White Emergo-Snowy'** (H3) 1
~ white-flowered; straight, fleshy pods with good flavour. Continued to crop well in trial even when the temperature was high
- 99 **'White Lady'** (PBR) (H3) 1-7-8-14-15-32
~ late; very fleshy pods
- 99 **'Wisley Magic'** (H3) 10-14
~ very long pods; very high early and late yield; previously listed as 'Pulsar', a name already in use for an earlier cultivar
- BEETROOT (*Beta vulgaris*)**
* The seed of beetroot, called a cluster, is the dried seedhead of the plant, which may contain as many as three true seeds. Monogerm varieties are bred to produce one seed per cluster.
- Beetroot varieties with long red root**
- 93 **'Cheltenham Green Top'** (H4) 1-2-4-5-12-13-14-16-20-21-22-23-25-26
~ good crop of uniformly shaped roots for late harvest; smooth skins and smooth shoulders. Good internal colour and sweet flavour. Reconfirmed after trial 2005
- 93 **'Forono'** (H4) 1-12-20-21-31
~ open pollinated. Cylindrical, with fairly smooth skins and roots of moderate uniformity; good internal colour. Slow to bulk up. Reconfirmed after trial 2005
- Beetroot varieties with round red root**
- 93 **'Action'** (H4) 8-22
~ F1 hybrid; early. Smooth uniform roots with good flesh colour and freedom from rings. Appears to have good bolting resistance. Bulks up quickly. Reconfirmed after trial 2001 and 2005

- 05 **'Alto'** (H4) 10
~ F1 hybrid; early. Cylindrical, uniform, smooth roots with very good internal colour. Potential to bulk up well.
- 93 **'Bikores'** (H4) 1-3-4-14-16-20-21-30
~ open-pollinated; uniform roots, with good flesh colour and freedom from internal rings. Good bolting resistance; bulked up well. Reconfirmed after trial 2001 and 2005
- 93 **'Boltardy'** (H4) 1-2-3-4-5-6-7-8-9-10-11-12-13-14-15-20-21-22-26-30-32 **19-31-35**
~ good bolting resistance
- 93 **'Bonel'** (H4) 1-32
~ good flesh colour and freedom from internal rings. Reconfirmed after trial 2001
- 05 **'Boro'** (H4) 1 **10-31**
~ F1 hybrid. Early, slightly flattened round shape. Bulked up well. Very smooth skins
- 01 **'Monodet'** (H4) 1
~ monogerm*; uniform roots with smooth skins and good flesh colour
- 93 **'Monogram'** (H4) 1-14 **12-14**
~ monogerm* with good flesh colour and smooth skins
- 93 **'Pablo'** (H4) 1-2-3-7-9-10-14-15-16-20-23-26-32
~ F1 hybrid; very early. Uniform roots with very smooth skins; very good internal colour and freedom from internal rings. Appears to have good bolting resistance. Widely used as a show cultivar. Reconfirmed after trial 2001 and 2005
- 01 **'Pronto'** (H4) 1-2-3-4-5-9-20-22-23-30
~ very uniform, with smooth skins and high yield potential
- 01 **'Red Ace'** (H4) 1-7-16-18-21-22-23-30-32 **12**
~ F1 hybrid; uniform roots with good flesh colour and no rings
- 93 **'Regala'** (H4)
~ very good flesh colour and good bolting resistance. Reconfirmed after trial 2001
- 05 **'Rubidus'** (H4)
~ early; slightly flattened round shape. Fairly smooth roots with good internal colour
- 05 **'Solo'** (H4) 1-8-10-11-14
~ F1 hybrid; monogerm*. Round to slightly flattened shape. Bulks up well; smooth roots of good internal colour
- 93 **'Wodan'** (H4) 3-10
~ F1 hybrid with round, slightly flattened shape. Smooth roots; good internal colour. Bulks up well. Reconfirmed after trial 2005
- BORECOLE or CURLY KALE (*Brassica oleracea* Acephala Group)**
- 00 **'Afro'** (H4) 32
~ medium height; mid-green leaves, curled to the edge. Winters well
- 93 **'Bornick'** (H4) 1
~ F1 hybrid; finely curled pale to mid-green leaves. For early cropping
- 93 **'Fribor'** (H4) 1
~ F1 hybrid; mid to dark green well-curved leaves. Winters well
- 99 **'Redbor'** (H4) 1-3-6-7-8-9-10-12-15-18-20-21-22-23-31-32 **35**
~ F1 hybrid. Tall plants with open habit; strongly curled purple-green leaves. Winters well
- 99 **'Reflex'** (H4) 6-23
~ F1 hybrid. Tall plants with very finely curled blue-green leaves. Winters well
- 93 **'Winterbor'** (H4) 1-2-20-21-22-30
~ F1 hybrid. Tall plants with finely curled blue-green leaves; winters well. Reconfirmed after trial 1999
- BROCCOLI, SPROUTING (*Brassica oleracea* Italica Group)**
- Purple sprouting broccoli**
- 03 **'Bordeaux'** (H4) 1-2-3-7-8-10-32 **12-15-35**
~ early. Compact plants which stand well over winter; fairly large heads of good colour
- 95 **'Claret'** (H4) 1-3-6-7-8-9-12-15-22-23
~ F1 hybrid. Very tall; heavy yield of dark purple spears from March through April
- 95 **'Early Purple Sprouting Improved'** (H4)
~ very tall; steady crop from March to April
- 95 **'Late Purple Sprouting'** (H4) 1-2-5-7-10-12-13-14-20-21-30 **19-31-35**
~ late. Vigorous tall plants, with good yield potential, easy to pick; reconfirmed after trial 2003
- 03 **'Purple Sprouting Improved'** (H4)
~ long cropping period; vigorous plants; high yield
- 95 **'Red Arrow'** (H4) 1-2-4-5-6-7-14-15-20-21-22
~ early to mid-season; long cropping period. Good winter hardiness; bushy, vigorous plants. Reconfirmed after trial 2003
- 95 **'Red Spear'** (H4) 1-14-23-32 **14-15-31**
~ early to mid-season; long cropping period. Good winter hardiness and yield; head colour fairly deep. Reconfirmed after trial 2003
- 95 **'Redhead'** (H4) 1-10-14
~ very tall plants; a good crop of large spears of good purple colour from early March through April
- White sprouting broccoli**
- 95 **'White Eye'** (H4) 10
~ tight white buds; early white spears for picking in March
- 95 **'White Star'** (H4) 1-2-4-14-23-30-32
~ good weight; late white spears for cutting in April
- BRUSSELS SPROUTS (*Brassica oleracea* Gemmifera Group)**
- 06 **'Abacus'** (H4) 16-22
~ F1 hybrid; early to mid-season. Good crop of dark green, solid, round sprouts
- 99 **'Bosworth'** (H4) 1-10-14-16-22-30
~ F1 hybrid; late. Oval, mid to dark green, solid, closely spaced sprouts. Easy to pick; plants stand well. Quality still good in February
- 06 **'Braveheart'** (H4) 2
~ F1 hybrid; late season. Vigorous plants that stand well and produce a good yield of dark green, well spaced, easy to pick, oval buttons. Good nutty flavour
- 99 **'Cascade'** (H4) 1-3-4-6-12-16-20-21-22-23-26-31
~ F1 hybrid; late. Smooth, clean, well spaced, fairly round sprouts. Uniform plants which stand and yield well
- 93 **'Cavalier'** (H4) 1-12-14-26
~ F1 hybrid; midseason. Dark green, well spaced sprouts. Plants produce high yields of good quality
- 99 **'Clodius'** (H4) 1-8
~ F1 hybrid; midseason. Good quality, round, smooth, solid, sweet sprouts. Plants stand and yield well
- 99 **'Diablo'** (H4) 1-10-14-15-23
~ F1 hybrid; mid season. Vigorous, uniform plant; sprouts well-spaced with good yield potential; round, medium-sized, pale green, and easy to pick. Reconfirmed after trial 2006
- 06 **'Eclisus'** (H4) 7
~ F1 hybrid; uniform, tall plants with well-spaced sprouts and an open habit, producing a good crop of round, mid-green sprouts

- 06 **'Genius'** (H4) 7
~ F1 hybrid; mid to late season. Shorter plants, producing good quality, mid-green, oval sprouts. Good yield potential. Holds well
- 93 **'Icarus'** (H4) 1
~ F1 hybrid; early. Large, smooth, solid sprouts. Plants stand well. Susceptible to white blister and ringspot
- 93 **'Igor'** (H4) 1-18 **12-13-15-30-31**
~ F1 hybrid. Mid to late season; attractive, vigorous, uniform plants producing well spaced, solid, round, mid-green sprouts. Reconfirmed after trial 2006
- 99 **'Lunet'** (H4) 1
~ F1 hybrid; midseason. Tall plants producing a very high yield of large, oval, fairly sweet sprouts which are easy to pick and have good resistance to ringspot. Plants can lodge (lean over)
- 06 **'Maximus'** (H4) 1-2-3-4-6-7-13-20-21-22-30-31
~ F1 hybrid; early to mid season. Uniform plants, producing a good crop of mid to dark green, smooth, solid sprouts
- 06 **'Montgomery'** (H4) 1-3-6-8-14-16-22 **14**
~ F1 hybrid. Mid to late season; tall, uniform plants that stand well, producing a good crop of clean, smooth, round mid to dark green, well-spaced sprouts
- 06 **'Nelson'** (H4) 1-10-14
~ F1; early. Good yield of attractive, smooth, pale green, solid sprouts
- 06 **'Oliver'** (H4) 1-2-12-20-21-22
~ F1; early. Uniform plants producing a good crop of solid, medium green sprouts of excellent quality
- 93 **'Patent'** (H4)
~ F1 hybrid; mid-season. Large, round, smooth, dark green, solid sprouts
- 99 **'Revenge'** (H4) 1-10-20-21-30-34
~ F1 hybrid; late. Very uniform plants producing a good yield of solid, round, clean, mid-green sprouts. Can be hard to pick
- 93 **'Roger'** (H4) 1
~ F1 hybrid; mid-season. Large, smooth, good quality, pale green sprouts. Plants stand well
- 99 **'Romulus'** (PBR) (H4) 2 **35**
~ F1 hybrid; late mid-season. Tall, vigorous plants that stand well. Good crop of attractive, clean, round, mid green sprouts. Reconfirmed after trial 2006
- 06 **'Silverline'** (H4) 9
~ F1 hybrid; mid-season. Tall, vigorous, uniform, clean plants, producing large numbers of mid-green, round, easy to pick sprouts
- 06 **'Valencia'** (H4) 7
~ F1 hybrid; early to mid-season. Medium to tall plants producing a good yield of well spaced, large, round, mid green sprouts. Reported to have done well in organic trials at other sites
- 00 **'Wellington'** (H4) 1-4-6-9-11-12-13-14-21-22-31
~ F1 hybrid; late. Very good quality smooth, dark green, round, solid sprouts
- CABBAGE (*Brassica oleracea Capitata* Group)**
- Spring cabbage (all pointed)**
- 01 **'Dorado'** (H4) 1
~ as a hearted cabbage. Attractive blue-green leaf; short-stemmed; well-hearted and uniform
- 93 **'Duncan'** (H4) 1-2-8-14-15-20-21-30 **35**
~ F1 hybrid. Mid to dark green uniform heads with well-closed bases. A good early yield; plants heart slowly to produce small, solid heads. Reconfirmed after trial 2001 as spring greens and hearted cabbage
- 01 **'Durham Elf'** (H4) 1-8-23
~ as a hearted cabbage; dark blue-green leaf; short-stemmed
- 01 **'First Early Market 218 – Early Market'** (H4) 1
~ as hearted greens. Quick-maturing, good quality heads
- 01 **'First Early Market 218 – Mastercut'** (H4)
~ as spring greens; attractive dark green outer leaves; well-filled hearts
- 93 **'First Early Market 218'** (H4) 1-14
~ mid-green, fairly compact heads of good colour and uniformity. Plants heart slowly to produce large, rather loose heads. Also as hearted greens
- 94 **'Jason'** (H4)
~ F1 hybrid; a vigorous variety producing heavy heads
- 93 **'Offenham 1 Myatt's Offenham Compact'** (H4) 1
~ mid to dark green attractive heads; medium to large, fairly solid hearts. Reconfirmed after trial 2001 as hearted cabbage
- 01 **'Offenham 3 – Mastergreen'** (H4) 1
~ as spring greens; very uniform heads with tidy leaf bases; light green leaves; well-filled hearts
- 93 **'Pixie'** (H4) 1-2-3-6-8-11-14 **12-15**
~ mid-green with good basal quality, producing small well-hearted heads. Reconfirmed after trial 2001 as a very early hearted cabbage
- 94 **'Pyramid'** (H4) 1-10-14-15-16-22 **14-31**
~ F1 hybrid. Very uniform, medium-sized, solid pointed heads, quite slow to mature; reconfirmed after trial 2001 as a hearted cabbage, and after trial 2002 as a summer cabbage
- 01 **'Sparkel'** (H4) 6
~ F1 hybrid. Late; attractive dark green leaves
- Summer cabbage (season June to August)**
- 98 **'Augustor'** (H3)
~ F1 hybrid; mid-season. Bright green compact plants; uniform, solid, medium-sized round heads with a short core
- 04 **'Candissa'** (H3) 1-7-20-21
~ F1 hybrid; early. Uniform, medium green, well-filled heads
- 02 **'Cape Horn'** (H3) 1-2-20-21
~ F1 hybrid; mid-season to late; pointed. A larger, smooth-leaved cabbage
- 98 **'Charmant'** (H3) 1-22
~ F1 hybrid; mid-season. Firm, uniform, attractive, medium to dark green heads. Reconfirmed after trial 2004
- 93 **'Derby Day'** (H3) 1-2-3-7-8-14-15 **9-12-13-15-17-31**
~ early. Bright, round, mid-green, well-filled heads. Reconfirmed after trial 1998
- 98 **'Elisa'** (PBR) (H3) 1-10
~ F1 hybrid; early. Compact round heads with bright green glossy leaves
- 02 **'Excel'** (H3) 3-7-8
~ F1 hybrid; pointed; mid-season to late. Uniform, tidy cabbage with a good colour and well-filled head
- 93 **'First of June'** (H3) 1-14
~ early. Round, mid-green, with fairly long internal core
- 98 **'Golden Cross'** (H3) 1-2
~ F1 hybrid; early. Very uniform, small, round, solid, bright green cabbage
- 98 **'Gonzales'** (H3) 1
~ F1 hybrid. A compact round cabbage with small, dense heads and attractive pale green leaves
- 98 **'Green Express'** (H3) 1
~ F1 hybrid; mid-season. Round, medium to large, dark green heads, well-filled with short cores
- 93 **'Grenadier'** (H3)
~ F1 hybrid; mid-season. Rather large, round, uniform, mid-green heads
- 02 **'Greyhound'** (H3) 1-2-3-4-5-6-7-8-9-10-12-13-14-15-20-21-25-30
~ early-maturing; pointed; pale to mid-green; medium to large frame

- 98 **'Hermes'** (H3)
~ F1 hybrid; early mid-season. Compact, round, solid, mid-green heads with short cores
- 02 **'Hispi'** (H3) 1-2-3-4-6-7-9-10-11-13-14-15-20-21-22-30-31
~ F1 hybrid; early. Smooth, pointed, dark green outer leaves, with good uniformity and well-filled heart
- 04 **'Hotspur'** (H3)
~ F1 hybrid; mid-season. Uniform, medium green, well-filled heads with shorter core
- 04 **'Independence'** (H3)
~ F1 hybrid; mid-season. Uniform, medium to dark green, solid, well-protected heads
- 02 **'Marshall's Kingspi'** (H3)
~ F1 hybrid; pointed; early. Small frame with a well-filled head
- 98 **'Metino'** (H3)
~ F1 hybrid; late. Flat to round, smooth heads with dark green leaves and very short cores
- 98 **'Nordri'** (H3)
~ F1 hybrid; early to mid-season. Round, solid, blue-green heads with short cores
- 98 **'Patron'** (H3)
~ F1 hybrid; mid-season. Round, solid, bright green heads with erect outer protecting leaves and short cores
- 04 **'Puma'** (H3) 6-8
~ F1 hybrid. Early, uniform, medium to dark green, well-filled heads
- 94 **'Pyramid'** (H4) 1-10-14-15-16-22 **14-31**
~ F1 hybrid. Very uniform, medium-sized, solid pointed heads, quite slow to mature; reconfirmed after trial 2001 as a hearted cabbage; after trial 2002 as summer cabbage
- 04 **'Redsky'** (H3) 6
~ F1 hybrid. Low-growing, compact plants producing small, round, dense heads with good dark red colour. Stands well.
- 04 **'Shelta'** (H3) 10
~ F1 hybrid. Mid-season, uniform, neat, smaller-framed plants; medium to dark green with very solid heads
- 02 **'Spitfire'** (H3) 1-12-20-21-26
~ F1 hybrid; mid-season. Pointed; quite large, with smooth, dark green outer leaves; good habit
- 93 **'Stonehead'** (H3) 1-2-8-12-14-15-18-20-21-22-26
~ F1 hybrid; late. Uniform, round, mid-green heads. Also useful for cropping into the autumn from later planting
- Savoy cabbage (season September to March)**
- 00 **'Alaska'** (H4) 8-23
~ F1 hybrid; mid-season to late. Dark green, well-blistered leaves; small to medium heads
- 95 **'Clarissa'** (H3) 8
~ F1 hybrid; early. Flattened round heads, with dark green leaves; solid. Good peppery flavour
- 00 **'Denver'** (PBR) (H4)
~ F1 hybrid; early to mid-season. Dark outer leaves with fine blister; heads dense, paler green, small to medium size
- 01 **'Endeavour'** (H4) 1-8-14
~ F1 hybrid; late. Attractive, mid-green, well-blistered, medium-sized heads with good internal quality and sweet taste. Long stems
- 95 **'Famosa'** (H3) 1-10
~ F1 hybrid; very early. Bright mid-green leaves with reddish veins. Plants uniform
- 93 **'Julius'** (H3)
~ F1 hybrid; very early. Bright green, attractive, large, round heads. Reconfirmed after trial 1995
- 95 **'Midvoy'** (H3) 1-20-21
~ F1 hybrid. Dark green blistered outer leaves with mid-green, solid, round hearts
- 00 **'Primavoy'** (H3) 1
~ F1 hybrid; early. Round, solid heads which do not stand well
- 95 **'Protovoy'** (H3) 1-6-9
~ F1 hybrid; very early. Dark green, well-blistered outer leaves; pale green, round, solid hearts
- 93 **'Taler'** (H4) 1
~ F1 hybrid; mid-season. Round to flat round, grey-green heads with good uniformity
- 93 **'Tarvoy'** (H4) 1-10-20-21-22
~ F1 hybrid; mid-season to late. Mid to dark grey-green, small, round, solid heads. Will stand for a long period after maturity. Reconfirmed after trial 2000
- 01 **'Tundra'** (H4) 1-2-3-4-6-7-8-9-10-11-14-15-20-21-26-32 **35**
~ F1 hybrid; dark green, slightly blistered leaf; heads solid and attractive. Sweet-tasting; overwinters well
- 01 **'Wintessa'** (H4) 1-8-13-20-21-22-30
~ F1 hybrid; late. Dark green well-blistered leaves, with uniform well-filled heads of good quality and flavour. Plants stand well
- 00 **'Wivoy'** (H4) 1-26
~ F1 hybrid; late. Tidy, dark green well-blistered leaves; slightly flattened, round, well-filled heads
- Early red cabbage (non-storing; season September to October)**
- 93 **'Langedijker Red Early'** (H3)
~ F1 round to oval, solid heads; less uniform than the hybrids
- 96 **'Rodeo'** (H3) 1-7
~ F1 hybrid. Good colour, short core; uniform
- 96 **'Rondy'** (H3)
~ F1 hybrid; early. Oval, smooth, uniform, solid heads
- 96 **'Rookie'** (H3) 1
~ F1 hybrid; early. Round to slightly flat heads
- 93 **'Ruby Ball'** (H3)
~ F1 hybrid; early. Uniform, round heads
- Winter hybrid cabbage (season November to March)**
- 98 **'Beretta'** (H4)
~ dark green, blistered, Savoy-like leaves with dense heads of good flavour
- 98 **'Celtic'** (H4) 1-2-6-9-12-14-15-20-21-30-31
~ large leafy plants with bright green leaves and good, solid, uniform heads. Reconfirmed after trial 2000
- 98 **'Colt'** (PBR) (H4) 11
~ a medium-sized, dense, good quality cabbage with good flavour
- 98 **'Embassy'** (H4)
~ lightly blistered, bright green leaves; well-filled and sweet-tasting
- 98 **'Renton'** (H4) 22
~ early-maturing
- 98 **'Roulette'** (H4) 12
~ small, well-filled heads; suitable for the smaller garden
- 98 **'Winchester'** (PBR) (H4)
~ small, good quality heads; suitable for the smaller garden
- January King cabbage (season November to March)**
- 98 **'Flagship'** (H4) 1
~ F1 hybrid; relatively early. Uniform, flat, round heads with pronounced purple colour. Plants stand well

- 98 **'Holly'** (H4) 1-3
~ F1 hybrid; flat, round, heads; dark green leaves with good purple colouring. Winters well
- 93 **'Marabel'** (H4) 1-14
~ F1 hybrid; mid-green leaves with good, deep red colour; round heads with good standing ability. Reconfirmed after trial 2000
- 01 **'Robin'** (H4) 7-8-14-15-18
~ F1 hybrid; dark green leaves with good purple colour; very sweet-tasting. Heads small and solid; plants have long stems which lean. Winter-hardy
- Winter white cabbage (for storage)**
- 93 **'Marathon'** (H3) 23-26
~ F1 hybrid; to harvest and store before frosts (stores well). Round to flat, solid heads
- CALABRESE (*Brassica oleracea Italica* Group)**
- 95 **'Arcadia'** (H3) 1-4-9-20-21-22-26
~ F1 hybrid; May sown. Late, small, mid to dark green buds, medium to heavy yields
- 03 **'Belstar'** (H3) 10 31
~ F1 hybrid; May sown. Mid to late season; uniform medium-sized plants, with attractive heads and medium to small buds
- 95 **'Corvet'** (H3) 1-14-18-30
~ F1 hybrid; May sown. Large heads with small buds; medium maturity (84 days from sowing); holds well; heads easy to see
- 95 **'Fiesta'** (H3) 1-10 12-15-31
~ F1 hybrid; May sown. Medium-sized heads with small buds set deep in the leaf; late-maturing (92 days from sowing)
- 95 **'Flash'** (H3) 1
~ F1 hybrid; May sown. Crops over a long period; large heads with small to medium bud size hold well (80-90 days from sowing)
- 03 **'Griffen'** (H3) 3
~ F1 hybrid; May sown. Mid-season, uniform, attractive, medium-sized heads with medium to large buds and succulent stalks
- 03 **'Hydra'** (H3)
~ F1 hybrid; May sown. Mid to late vigorous plants; uniform crop, medium to small, dark green, domed heads. Average yield of very large to medium-sized secondaries about 5 weeks after the primary heads
- 03 **'Kabuki'** (H3) 1-3-8-10-14-15
~ F1 hybrid; May sown; early. Short, compact plants, producing a good crop of medium green, deep, well-rounded heads with uniform buds. Average yield of medium-sized secondaries, produced 3 to 5 weeks after the primary heads
- 95 **'Lord'** (H3)
~ F1 hybrid; May sown. Medium-maturing; large heads set down within leaves (85 days from sowing)
- 03 **'Mistral'** (H3)
~ F1 hybrid; May sown; mid-season, uniform, vigorous plants with attractive, dark green, well-domed heads with uniform buds
- 95 **'Skiff'** (H3)
~ F1 hybrid; May sown. Medium to large heads crop over a long period and hold well (80-90 days from sowing)
- 95 **'Tiara'** (H3) 1-3-12
~ F1 hybrid; May sown. Early, medium-sized heads
- 95 **'Trixie'** (H3)
~ F1 hybrid; May sown. Early to mid-season, medium-sized plants with blue-green leaves and attractive medium to dark green, domed heads with small buds. Very high yield of medium-sized secondaries produced 3 to 5 weeks after the primary heads. Reconfirmed after trial 2003
- 95 **'Viking'** (H3)
~ F1 hybrid; May sown. Early, small heads. Does not stand well. Concentrated maturity (80 days from sowing)
- CARROT (*Daucus carota*)**
- 99 **'Adelaide'** (H3) 1-10
~ F1 hybrid; very early. Quickly forms very smooth, stump-ended roots; almost coreless; fine tops. Ideal for successional sowings and early sowing in frames. Reconfirmed after trial 2006
- 06 **'Amsterdam Forcing 3'** (H3) 1-6-8-9-15-25
~ open-pollinated. Relatively smooth, long and cylindrical, with good flesh and core colour; bulks up well. Strong foliage that does not grow too tall
- 95 **'Autumn King 2'** (H3) 1-2-3-4-5-6-7-9-10-11-12-14-20-21-25-30-35 **3-19-31**
~ maincrop. Large, tapering stump roots; strong tops; bold shoulders. Ideal for storing
- 93 **'Bangor'** (H3) 1-9-10-22
~ F1 hybrid. Blunt, medium-length, smooth roots. Well-filled with good uniform shape and medium-orange internal colour. Bulks up well. Can be stored over winter; reconfirmed after trial 2005
- 95 **'Barcelona'** (H3)
~ F1 hybrid; maincrop. Long, smooth, cylindrical, deep orange roots. Strong healthy tops; shows mildew tolerance. Ideal for winter storage
- 95 **'Berjo'** (H3) 1-8-14
~ maincrop. Heavy yields of smooth cylindrical roots with bright orange flesh. Suitable for storing
- 95 **'Bertan'** (H3) 1
~ F1 hybrid; maincrop. Very sweet orange-fleshed cylindrical roots that resist splitting. Ideal for storing
- 93 **'Bolero'** (PBR) (H3) 1
~ F1 hybrid. Later-maturing maincrop; long, slender, cylindrical roots of good uniformity and colour; can be stored from later sowings
- 93 **'Camberley'** (H3) 1-14
~ maincrop. Long roots, deep orange flesh
- 95 **'Camden'** (H3) 1
~ F1 hybrid; 'Chantenay' × 'Autumn King'. Maincrop maturity. Large bold roots with deep orange flesh. An excellent storing variety
- 93 **'Campestra'** (H3)
~ open-pollinated. Best lifted before Christmas. Medium to long, cylindrical, blunt, smooth roots with uniform deep orange internal colour; well-filled. Bulks up well. Reconfirmed after trial 2005
- 05 **'Carson'** (H4) 10
~ F1 hybrid; 'Chantenay' type. Medium to short, conical, smooth, uniform roots with good internal colour. Strong growing tops; bulks up well. Characteristic good 'Chantenay' flavour. Its short roots makes it useful for heavy, difficult soils
- 93 **'Cleopatra'** (H3)
~ F1 'Autumn King' hybrid. Heavy, smooth, long, well-coloured roots of good flavour. Excellent storage variety
- 05 **'Eskimo'** (H4) 1-6-8-9
~ F1 hybrid; medium-length, smooth roots with good colour. Useful size, well-filled. Grows with crowns at or below ground level, so very little crown discoloration. Good overwintering cultivar
- 94 **'Evora'** (H3)
~ F1 hybrid; a long, slender-rooted hybrid, excellent as a bunching carrot. Ideal for successional sowings and for early sowing in frames

- 99 **'Flyaway'** (H3) 1.2.3.4.5.7.10.11.14.16.20.21.22.26.30.32.35 **12.14.15.31**
~ F1 hybrid. Maincrop; medium-length, well-filled, stump-ended roots with good flesh and core colour. Good strong tops. Partial resistance (i.e. lack of attraction) to carrot flies. Reconfirmed after trial 2006
- 06 **'Ideal'** (H3) 1.6.9.14
~ open-pollinated. 'Nantes' type; uniform crop of fairly smooth, medium length, cylindrical well-filled roots with good flesh and core colour. Strong top growth
- 05 **'Indiana'** (H4)
~ F1 hybrid. 'Imperator' type. Very long, slim, pointed root with good internal colour and no green shoulders. Vigorous top growth. Suited to deep, light soils
- 93 **'Ingot'** (H3) 1.3.10.20.21
~ F1 hybrid. Maincrop; almost coreless, long, cylindrical roots; sweet, deep orange flesh with claimed high vitamin 'C' content
- 95 **'Kamaran'** (H3)
~ F1 'Autumn King' hybrid. Best lifted before Christmas. Uniform, blunt-rooted, medium to long with smooth skins. Good internal colour. Well-filled; bulks well. Reconfirmed after trial 2005
- 95 **'Kazan'** (H3)
~ F1 'Autumn King' hybrid for later sowing for winter storage. Very good colour and flavour for a late carrot. Strong tops. Heavy yields
- 95 **'Kingston'** (H3) 1.3.10.30
~ F1 'Autumn King' hybrid for later sowing for winter storage. One of the best for colour, taste, yield and uniformity. Strong tops
- 99 **'Maestro'** (PBR) (H3) 1.3.6.9.22
~ F1 hybrid. Best lifted before Christmas. Blunt, smooth-skinned, medium to slim, fairly well-filled roots, uniform in size and shape. Mid to pale internal colour with some green shoulders. Widely grown by organic carrot growers. Reconfirmed after trial 2005
- 93 **'Mokum'** (H3) 10
~ F1 hybrid. Slightly tapering roots, well-coloured to the tip; good sweetness; almost coreless. Good for bunching
- 99 **'Nairobi'** (H3) 1.15.20.21.22
~ F1 hybrid; second early/early maincrop. Strong tops, with uniform, broader-shouldered, cylindrical, stump-ended roots. Heavy yields. Reconfirmed after trial 2006
- 93 **'Nantucket'** (H3) 1.26
~ F1 hybrid; early-maturing maincrop. Smooth, deep orange, blunt-ended, good quality roots. Ideal for successional sowings and early sowing in frames. Reconfirmed after trial 1999
- 93 **'Napoli'** (H3) **12.15**
~ F1 hybrid, very early maturing. Strong tops for easy pulling; quick to bulk up. Ideal for successional sowings and early sowing in frames
- 94 **'Natan'** (H3)
~ F1 hybrid; early-maturing. Strong tops for easy pulling; quick to bulk up. Ideal for successional sowings or early sowing in frames
- 93 **'Newmarket'** (H3) 30
~ maincrop; longer-rooted F1 hybrid. Heavy yields of broader-shouldered, smooth, tapering roots of sweet taste and good colour
- 93 **'Panther'** (H3)
~ F1 hybrid; early-maturing. Smooth, cylindrical, stump-ended, coreless roots. Ideal for successional sowings or early sowing in frames
- 93 **'Parabell'** (H3) 1.14
~ early-maturing, round-rooted, smooth 'Paris Market' type of good flavour. Ideal for successional sowings and early sowing in frames. Reconfirmed after trial 1999
- 93 **'Parano'** (H3) 5.6.31
~ F1 hybrid. Smooth-skinned, cylindrical, almost coreless, blunt-ended roots with good flesh and core colour. Ideal for successional sowings and early sowing in frames. Reconfirmed after trial 2006
- 93 **'Parmex'** (H3) 1.6.7.9.10.11.16.32
~ hybrid. Early-maturing, round-rooted 'Paris Market' type; smooth roots with high crown and good colour. Also very good for successional sowing from mid May and pulling young. Matures in 10-12 weeks. Reconfirmed after trial 2006
- 06 **'Primo'** (H3) 1.2.8.15
~ hybrid; uniform crop of smooth, stump-ended roots with good length and good colour. Strong tops
- 05 **'Sugarsnax 54'** (H4) 1.5.6.7.8.10.12.15.20.21.22
~ F1 hybrid. Very long, smooth, 'Imperator' type with roots of good internal colour. Suited to deep, light soils. Commercially used, cut into short lengths and sold as pre-packed 'baton' carrots
- 94 **'Sytan'** (H3) 10
~ maincrop; smooth, broader-shouldered, tapering roots of good colour and sweet taste; shows partial resistance (i.e. lack of attraction) to carrot fly. Reconfirmed after trial 1999
- 99 **'Tempo'** (H3)
~ F1 hybrid. Smooth, medium-length stump-ended roots of good colour and taste; quick to bulk up. Ideal for successional sowings and early sowing in frames
- 06 **'Trevor'** (H3) 7.22.26
~ hybrid ('Nantes' x 'Touchon'). Uniform crop of stump-ended, smooth roots with uniform length and good flesh and core colour
- 06 **'Valor'** (H3) 6.8
~ hybrid; early 'Nantes' type. Smooth, blunt roots of good length with good flesh and core colour. Bulks well. Has strong tops
- 99 **'Yukon'** (H3) 2.22
~ F1 hybrid; very uniform crop. Bulks up quickly to produce cylindrical stump-ended roots of good length, colour and flavour. Ideal for successional sowings and early sowing in frames. Reconfirmed after trial 2006

CAULIFLOWER (*Brassica oleracea* Botrytis Group)

Winter cauliflower for spring heading (maturing from March to May)

- 97 **'Admirable'** (H4)
~ F1 hybrid; early mid-season. Good quality, medium-sized heads
- 05 **'Aalsmeer'** (H4) 1.6.14
~ open-pollinated cultivar; early mid-season. Produces medium to small, cream-coloured, slightly lumpy, well-protected curds that have a good depth. This cultivar produced several multiple heads and side-shoots, many of usable quality
- 97 **'Christingle'** (H4) 14
~ open-pollinated; mid to late season. Vigorous plants producing a high yield of creamy to white, solid curds with very good depth. Reconfirmed after trial 2005
- 97 **'Colombo'** (H4)
~ F1 hybrid; very early. Deep white curds
- 97 **'Dalton'** (H4)
~ F1 hybrid; early. Very good quality; medium to large curds

- 05 **'Evita'** (H4) 1-6
~ open-pollinated cultivar. Late season. Good quality, medium-sized curds produced over a period of almost four weeks. A cultivar that the Committee particularly noted for the length of cutting time
- 97 **'Galleon'** (H4) 1-9
~ early mid-season. Medium to large, good quality curds, with very good leaf protection
- 97 **'Jerome'** (H4) 8-22
~ F1 hybrid; early mid-season. Vigorous plant, producing good quality, well-covered curds. Curds well-rounded, medium to small and cream-coloured. Reconfirmed after trial 2005
- 97 **'Martian'** (PBR) (H4)
~ F1 hybrid; early mid-season. Very vigorous plants, producing good quality, medium-sized curds with good depth. Reliable cultivar countrywide. Reconfirmed after trial 2005
- 97 **'Mayfair'** (PBR) (H4) 35
~ F1 hybrid; mid-season. Good quality, medium-sized, solid curds
- 97 **'Nomad'** (H4)
~ F1 hybrid; mid-season. Good quality, medium-sized curds
- 05 **'Patriot'** (H4) 9-15
~ open-pollinated cultivar; mid to late season. Produces a good yield of quality, medium-sized curds that have a good depth and are well covered
- 97 **'Prestige'** (H4) 1-6
~ open-pollinated; mid to late season. Produces medium-sized, creamy curds. A reliable cultivar countrywide. Reconfirmed after trial 2005
- 97 **'Walcheren Winter 3 – Armado'** (H4) 3-7-8-10
~ early with a long cutting season. Good quality curds
- 97 **'Walcheren Winter – Armado May'** (H4) 1
~ early mid-season. Good quality, medium to large curds
- Summer heading cauliflower (season June to mid July)**
- 97 **'Amsterdam'** (H3) 26
~ F1 hybrid. Midseason to late, large to medium sized, well-protected deep, white, solid curds. Reconfirmed after trial 2006 as spring sown
- 06 **'Andes'** (H3) 3-7
~ hybrid; early. High quality curds, medium-sized, creamy-white and solid. Leaves give moderate curd protection
- 97 **'Asterix'** (H3)
~ F1 hybrid; mid-season. Vigorous plants with long leaves and medium-sized, white, solid, well-protected curds
- 93 **'Aubade'** (H3)
~ early to mid-season. Not very vigorous plants with semi-erect leaves and smooth curds
- 06 **'Avalanche'** (H3) 3-10
~ hybrid; midseason. Attractive, high quality, medium to large sized, white, solid curds
- 06 **'Aviron'** (H3) 1-8-20-21-22-26
~ hybrid; late. High quality, well-protected, large to medium sized solid, white heads
- 97 **'Barcelona'** (H3) 22-26
~ F1 hybrid; mid-season. Deep, round, solid, well-protected curds
- 97 **'Beauty'** (H3) 1-16-22-23-26
~ F1 hybrid; mid-season to late. Fairly vigorous plants with deep, white, solid curds
- 97 **'Fargo'** (H3) 1-22
~ F1 hybrid; late. Deep, white, well-protected curds
- 97 **'Fastman'** (H3)
~ early to mid-season. Plants with rather spreading leaves and solid heads
- 06 **'Flamenco'** (H3) 18-22
~ hybrid; midseason to late. Very high quality, large to medium sized, white, solid curds with good depth
- 97 **'Gypsy'** (H3) 10
~ F1 hybrid; mid-season. Plants with medium to large frames; white curds
- 97 **'Mayflower'** (H3) 1-3-6-7-8
~ F1 hybrid; very early. High quality, medium-sized, white, solid curds Reconfirmed after trial 2006
- 97 **'Nautilus'** (H3) 1-14-22-26
~ F1 hybrid; late. Vigorous plants with deep, white, well-protected curds of excellent quality
- 93 **'Perfection'** (H3) 1
~ very early. Large curds; tend to be flat
- 93 **'Plana'** (H3)
~ F1 hybrid; midseason. Uniform, vigorous plants with large creamy white curds
- 97 **'Predominant'** (H3) 1
~ early midseason. Medium sized, solid, deep curds
- 93 **'White Rock'** (H3) 1-2-14
~ late. Deep, white, well protected curds
- Autumn heading cauliflower (season September to November)**
- 02 **'Autumn Glory'** (H3) 1
~ early, cropping over a longer period; smaller, creamy curds; good depth
- 02 **'Aviso'** (H3) 7-16-22-26
~ F1 hybrid; early cropping, with a short cropping period; high proportion of first-class, smooth, white curds
- 93 **'Belot'** (H3) 1-2-14-20-21 31
~ F1 hybrid; very late, large, compact, deep, solid, very white curds. Extremely well-protected
- 93 **'Castlegiant'** (H3) 8-11
~ F1 hybrid; mid-season. Well-protected, smooth, solid curds which can be flattish and show some looseness
- 93 **'Kestel'** (H3) 1-14-15-26
~ early mid-season. Smooth curds, tending to yellow
- 93 **'Lindon'** (H3)
~ F1 hybrid; mid-season. Well-protected, good quality, deep curds
- 02 **'Minneapolis'** (H3) 16-22-26
~ F1 hybrid; mid-season to late maturity, cropping over a long period; deep, smooth, firm curds
- 02 **'Moby Dick'** (H3) 7
~ F1 hybrid; early with a short cropping period; uniform, very deep, heavy curds
- 02 **'Pavilion'** (PBR) (H3) 10
~ F1 hybrid; early with a short cropping period; very uniform; good white colour, size and depth
- 02 **'Regata'** (H3) 3
~ F1 hybrid; mid-season with a long cropping period; deep, solid curds
- 02 **'Skywalker'** (H3) 1-10-14 12-31
~ F1 hybrid; early with a short cropping period; very good white colour, size and depth
- 94 **'Talbot'** (H3)
~ late with a long cropping period; good depth and size; creamy colour. Reconfirmed after trial 2002
- 02 **'Valtos'** (H3) 16-22
~ early. White deep well-protected curds
- 93 **'Vidoke'** (H3)
~ F1 hybrid; late. Medium-sized, solid, deep, white curds
- 02 **'White Excel'** (H3) 10
~ F1 hybrid; early with a short cropping period; very uniform; bright white colour; good size and depth. High proportion of first-class, superb, firm curds

Coloured and Romanesco94 **'Alverda'** (H3) 1-2

~ early to mid-season. Smooth, green curds of good depth with some bract-ing. When cooked, the contrast between the green surface of the curd and its white centre is very attractive

05 **'Cheddar'** (H3) 1-7

~ F1 hybrid; firm, deep orange-yellow curds that keep their colour both internally and externally when cooked

05 **'Emeraude'** (H3)

~ F1 hybrid; solid, heavy, smooth, bright green curds, which keep their surface colour when cooked. This contrasts well with the white internal flesh

94 **'Esmeraldo'** (H3)

~ F1 hybrid. Smooth green curds of good depth. Attractive when cooked

05 **'Graffiti'** (H3) 1-3-7-16-32

~ F1 hybrid. Small to medium, high quality, solid curds of a very attractive amethyst colour. Colour fades a little if boiled, but is retained better if steamed. Raw curds have a good flavour and would be a colourful addition to a salad or dish of crudités. Midseason. Reconfirmed after trial 2006

94 **'Marmalade'** (H3) 1-2

~ F1 hybrid; very early; deep, orange curds

94 **'Minaret'** (H3) 1-14

~ early. Green curd formed of a spiral of pyramidal pinnacles. Can become loose

94 **'Red Lion'** (H3) 1-14 35

~ very late. Small, attractive, purple heads

05 **'Veronica'** (H3)

~ F1 hybrid; appetising light green Romanesco type. Uniform good-sized, solid, well-shaped heads

94 **'Violet Queen'** (H3)

1-10-12-13-15-20-21-30

~ very early. Purple, medium-sized curds of good depth

94 **'Violetta Italia'** (H3) 1

~ very early. Purple, medium to large curds of good depth

CELERIAC (*Apium graveolens* var. *rapaceum*)00 **'Diamant'** (H3) 32

~ clean, white, medium-sized

00 **'Tbis'** (H3) 1 19-31

~ neat round ball, very uniform, fairly small

00 **'Kojak'** (H3)

~ flattened ball shape, clean and white; very smooth

93 **'Monarch'** (H3) 1-8-9-10-11-14 19

~ white-skinned, bold and smooth

00 **'Prinz'** (H3) 1-22 5-12-13-15-17-21-30-31-35

~ smooth, small to medium, flattened and round

CELERY (*Apium graveolens* var. *dulce*)93 **'Celebrity'** (H3) 1-22

~ self-blanching, fairly short plants, with ribbed petioles and good flavour. Reconfirmed after trial 2001

94 **'Crystal'** (H3) 14-16

~ F1 hybrid; self-blanching, fairly tall, with smooth petioles and attractive, upright habit

93 **'Giant Pink – Mammoth Pink'** (H3) 1

~ pink-tinged, green variety for blanching or earthing up; solid stems

05 **'Granada'** (H3) 1-8-14

~ F1 hybrid; pale green, reasonably smooth, quite fleshy petioles. Medium to strong flavour. Resistant to celery leaf spot (blight) caused by the *Septoria apiicola* fungus

93 **'Ivory Tower'** (H3) 1

~ self-blanching; tall with smooth petioles and good flavour

94 **'Lathom Self Blanching Galaxy'** (H3)

~ self-blanching; medium-length petioles; ribbed, bold plants

93 **'Lathom Self Blanching'** (H3) 1-11

~ self-blanching, with short ribbed petioles and good flavour. Vigorous habit. Reconfirmed after trial 2001

94 **'Loret'** (H3)

~ self-blanching short plants; rather ribby

05 **'Loretta'** (H3) 7-8-9

~ open-pollinated; early. Uniform, long, well-blanching, attractive petioles. Good sweet flavour

01 **'Moonbeam'** (H3)

~ good length of smooth petioles; good weight

94 **'Octavius'** (H3) 3-14

~ F1 hybrid. Attractive, uniform crop; short to medium-length, slightly ribbed, succulent petioles. Reconfirmed after trial 2005

01 **'Tango'** (H3) 10-34

~ open-pollinated; slower-maturing, long, mid-green, fleshy petioles. Reconfirmed after trial 2005

94 **'Victoria'** (H3) 1-3-4-8-9-10-11-14-32 14-35

~ F1 hybrid. Tall, well-filled plants with medium-green, smooth, fleshy petioles. Widely used for commercial crops. Reconfirmed after trial 2005

CHARD (*Beta vulgaris* subsp. *cicla* var. *flavescens*) – see also spinach beet00 **'Bright Lights'** (H3) 3-6-7-8-9-10-11-14-30-32 35

~ good colourful mix, including reds, yellows and whites; very ornamental and decorative

00 **'Bright Yellow'** (H3) 1-3-6-10-15

~ bright golden-yellow petioles and mid-green puckered leaf

00 **'Charlotte'** (H3) 1-3-7

~ striking red colour, nice upright leaf, neat plant habit

00 **'Fordhook Giant'** (H3) 4-8-11

~ attractive shiny green, puckered leaf with long succulent white petioles

00 **'Lucullus'** (H3) 1-10

~ plenty of tender, light green leaf with long succulent white petioles

00 **'Rhubarb Chard'** (H3) 1-4-5-9-10-13-14-15-16-20-21-22-25-27-30 12-15-19-31

~ good red colour; uniform

CHICORY – LEAFY TYPES (*Cichorium intybus*) Radicchio02 **'Indigo'** (H3) 14-32

~ dense round heads; very uniform with dark green outer leaves and red hearts

02 **'Leonardo'** (H3)

~ well-developed heart; good internal red colour

02 **'Palla Rossa'** (H3) 1-2-4-14-21-27 12-13-15-17-21-30-31

~ medium to large heads; well-filled red hearts; fairly uniform. No bolting

Sugar loaf02 **'Pan di Zucchero'** (H3)

~ uniform plants with medium to large frames and dark green outer leaves. Hearts blanch well

02 **'Zuckerhut'** (H3) 19

~ medium-sized plants with dark green outer leaves and well-developed, well-blanching hearts

CHILLI PEPPER (*Capsicum* species)06 **'Apache'** (H2) 1-3-6-9-16-20-21-22-30

~ decorative, growing to 45cm; does well in both large and small pots. Produces large crop of small, juicy, hot peppers that ripen from bright green to red and are held outwards from the stems

- 06 **'Caribbean Antillais'** (H2) 1
~ quite small, blocky, bright red fruits; aromatic and very hot, of a type widely used in South American and Caribbean cooking. Later cropping, best sown in January and given a higher temperature to germinate
- 06 **'Demon Red'** (H2) 9-10
~ a small, ornamental plant, starred with white flowers, it produces an abundant crop of tiny upward pointing fruits that mature to dark, bright red. Fruits are hot and used in Thai cooking
- 06 **'Etna'** (H2) 3-7-27
~ attractive bunches of erect, shiny peppers that mature from bright mid-green to red, carried on compact plants that are suitable for growing in pots. Large crop of very hot peppers.
- 06 **'Fiesta'** (H2) 1-7 **13-31**
~ highly ornamental, 80cm high plants; starred with white flowers and covered in small, jewel-like, conical fruits that ripen through purple, yellow and orange to bright red. Excellent decorative plant for growing in pots
- 06 **'Filius Blue'** (H2) 18
~ attractive, highly ornamental plants. The young leaves are mid-green, becoming very dark green with a purple flush; the plants are covered with purple, orange and bright red fruits that are spicy and hot
- 06 **'Firecracker'** (H2) 1
~ very ornamental, uniform plants with small, very hot peppers that are held upright and give an attractive sunset display once they have matured beyond purple
- 06 **'Fresno'** (H2) 1
~ fairly short, upright growing plants; very productive. The conical fruits ripen from light green to deep scarlet red, with medium thick flesh that is very hot
- 06 **'Fuego'** (H2) 1-27
~ good yield of early, easy to harvest, big, red fruits. A hot pepper with thick, meaty flesh
- 06 **'Habanero'** (H2) 1-4-5-7-14-20-21-22-32 **12-13-15-17-31**
~ very attractive, blocky, orange fruits; very hot. Plants quite compact; good yield; suitable for growing in pots. Later-cropping, it is best sown in January
- 06 **'Hungarian Hot Wax'** (H2) 1-7-18-20-21-22-25-30 **12-13-15-17-19-31**
~ conical fruits ripening from pale yellow to bright red; medium hot; very good for frying, stuffing and using in salads. One of the easiest to grow. Suitable for growing in pots
- 06 **'Navaho'** (H2) 1-4-20-21 **13**
~ sturdy plants with stiff stems that carry the fruits well. Bright red, large, thick-fleshed, semi-hot peppers; good for stuffing
- 06 **'Prairie Fire'** (H2) 4-7-10-16-18
~ very attractive, short (20cm high), spreading plants covered in a mass of very small, very hot, upright peppers that ripen from white, through yellow and orange, to red. Ideal for pots or a windowsill
- 06 **'Summer Heat'** (H2) 1
~ reliably early, very hot, Jalapeno type pepper. Prone to corkiness and cracking, which is a trait valued by Mexican cooks
- 06 **'Super Chilli'** (H2) 1-4-7
~ ornamental plants; well suited to growing in pots. Produces a high yield of very hot, thin-walled fruits that are held upright and ripen from light green to orange-red
- 06 **'Thai Dragon'** (H2) 1-4-10
~ very hot pepper used in Thai cooking. Plants fruit prolifically, but tend to be rather rampant and may need tying. Also responds well to stopping
- 06 **'Tri-colour Variegata'** (H2) 4-15-18
~ ornamental foliage attractive mid-green, splashed cream and purple. Small fruits mature from purple, through orange to red. 70cm-high plants with a rather spreading habit, but can be pruned to shape
- CHINESE CABBAGE (*Brassica rapa Chinensis* & *Pekinensis* Groups)**
- 03 **'Early Jade Pagoda'** (H3) 1
~ cylinder-shaped or 'Michihili' type. Uniform tall plants; dark green, clean outer leaves; later-maturing, short internal stem
- 03 **'Green Tower'** (H3)
~ intermediate between barrel and cylinder. Above average height; uniform, clean outer leaves; well-filled heads of good weight; short internal stems
- 03 **'Kasumi'** (H3) 1-3
~ barrel-shaped, small-framed; solid heads, good yield, well-blanching, with short internal stems; attractive green outer leaves
- 93 **'Kingdom 65'** (H3)
~ F1 hybrid; medium, green barrel-shaped heads
- 93 **'Mariko'** (H3)
~ F1 hybrid. Barrel-shaped, small-framed. Slower-maturing, attractive green outer foliage, well-blanching, stands well. Reconfirmed after trial 2003
- 03 **'Mirako'** (H3)
~ barrel-shaped. Attractive, neat, good internal blanching; slower-growing than some others in trial; nice green outer foliage; stands well
- 93 **'Nerva'** (H3)
~ F1 hybrid; early, dense, barrel-shaped heads
- 03 **'One Kilo SB'** (H3) 5-6
~ barrel-shaped. Early-maturing, medium to pale green outer leaves; slow to bolt; solid heads; short internal stem
- 03 **'Yuki'** (H3) 1-13-20-21
~ barrel-shaped. Medium green, slightly savoyed outer leaves; very short internal stem; medium-sized heavy head; well-blanching
- CORN SALAD (*Valerianella locusta*)**
- 94 **'Baval'** (H3)
~ mid-green, medium-leaved; good flavour. Made good growth and remained free of disease under frames
- 94 **'Cavallo'** (H3) 10
~ long-leaved traditional type; gives a good yield under frames
- 94 **'Medaillon'** (H3)
~ slow-growing, short, thick-leaved under frames
- COURGETTE (*Cucurbita pepo*)**
- 93 **'Acceste'** (H3)
~ F1 hybrid. Very high yield of heavy, medium to long, lightly speckled fruits
- 93 **'Astoria'** (H3)
~ F1 hybrid. High yield of heavy, medium-length fruits
- 98 **'Bambino'** (H3) 1-3-7-14-32
~ F1 hybrid. Bush type; a high yield of dark green fruits
- 98 **'Blackjack'** (H3) 1-27
~ F1 hybrid. Bush type; a high yield of slender, very dark green fruits
- 98 **'Consul'** (H3)
~ F1 hybrid. Bush type; a very high yield of slender, mid-green fruits
- 93 **'Defender'** (H3) 1-4-7-9-10-14-16-20-21-22 **3-12-14-15-31**
~ F1 hybrid. A high yield of medium-sized, slender, very lightly flecked fruits
- 93 **'Early Gem'** (H3) 1-2-20-21
~ F1 hybrid; a high yield of slender, lightly speckled fruits. Easy to see on the plant
- 98 **'El Greco'** (H3) 1-6-9-32
~ F1 hybrid. Bush type; plant of open habit with mid-green fruits

98 **'Jemmer'** (H3) 1-10-13-20-21-30-34 **31**
~ F1 hybrid. Bush type; high yield of slim yellow fruits

93 **'President'** (H3) 1
~ F1 hybrid. A high yield of medium-sized, medium-speckled fruits

98 **'Raven'** (H3) 1
~ F1 hybrid. Bush type; a good yield of dark green fruits

93 **'Supremo'** (H3) 6-14
~ F1 hybrid. A very high yield of heavy, dark green fruits

98 **'Valiant'** (H3) 1
~ F1 hybrid. Bush type; a good yield of dark green fruits

98 **'Venus'** (H3) 8-10
~ F1 hybrid. Bush type; smooth, spine-free stems with dark green glossy fruits

CUCUMBER (*Cucumis sativus*)

93 **'Athene'** (H1-2)
~ F1 hybrid. High yield of medium-length, slim, bright, dark green fruits with slightly bulbous end; slightly ribbed

02 **'Birgit'** (smooth-skinned) (H1-2) 1-3-7
~ F1 hybrid. High yield of medium-length, smooth fruits; good for exhibition

95 **'Bush Champion'** (ridge) (H3) 1-3-20-21-31
~ F1 hybrid. High yield of short dark green fruit

02 **'Carmen'** (H1-2) 1-10-16-22-23-26-32
~ F1 hybrid; high yield of standard length, dark green, slightly ribbed fruits

93 **'Danimas'** (H1-2)
~ F1 hybrid. Very short-fruited variety, producing many well-proportioned fruits per plant

93 **'Femdan'** (H1-2) 1-14-16-22
~ F1 hybrid. Traditional long cucumber with nice neck and very dark prolific fruiting

95 **'Fortos'** (gherkin) (H3)
~ attractive uniform fruit

02 **'Macao'** (H1-2)
~ F1 hybrid; high yield of very attractive, glossy, straight, dark green fruits; very uniform

95 **'Marketmore'** (ridge) (H3) 1-6-7-8-9-14-27-5-7-9-12-13-14-15-17-30-31-35
~ good yield of short, attractive, dark green fruits. Grown in the open garden. Reconfirmed after trial 2001

01 **'Masterpiece'** (H3) 1-10
~ fairly short, slender, smooth-skinned, dark green cucumber, nice and straight, with good flavour and healthy foliage. Grown in the open garden

93 **'Monique'** (H1-2)
~ F1 hybrid. Traditional long cucumber; long-necked but very straight. Moderate yield

01 **'Prima Top'** (H3) 9
~ F1 hybrid; medium-length, dark green, long, smooth-skinned cucumber with good flesh colour and healthy foliage. Grown in the open garden

02 **'Teide'** (H1-2)
~ F1 hybrid; medium to long, mid-green, slightly ribbed fruits

01 **'Tokyo Slicer'** (H3) 1-11-14
~ F1 hybrid; long, smooth-skinned, dark green, uniform fruits. Grown in the open garden

02 **'Tyria'** (H1-2) 1 31
~ F1 hybrid; attractive, dark green, slightly ribbed fruits

02 **'Zeina'** (H1-2) 23
~ F1 hybrid; very high yield of short, very uniform, bright fruits with a slight handle. A very strong-growing plant

ENDIVE (*Cichorium endivia*)

96 **'Atria'** (curled) (PBR) (H3)
~ very fine-cut leaf. Well-blanching and solid-hearted

02 **'Frisée Glory'** (H3) 1
~ frisée endive with small frame and uniform, deeply, finely cut leaf. An attractive addition to a salad

96 **'Golda'** (H3)
~ short-leaf Batavian type. Well-hearted

96 **'Jeti'** (curled) (H3) 1-13
~ a broad-leaved endive with uniform mid-green heads of good quality. Reconfirmed after trial 2002

02 **'Lassie'** (PBR) (H3)
~ frisée endive; high yield, very deeply cut leaf; medium frames; good flavour

96 **'Pancalieri'** (curled) (H3) 1-20-21-27-30-5-12-13-15-20-21-30-31
~ very strong cut-leaf type. Does not blanch well

96 **'Sally'** (curled) (H3)
~ extra fine-cut leaf. Small size and flat-growing

02 **'Wallone'** (H3) 13-15 19
~ frisée endive, very vigorous, with a large frame. High yield of mid to dark green, finely cut leaf. Suits 'cut and come again' cropping

FENNEL, FLORENCE (*Foeniculum vulgare* var. *azoricum*)

05 **'Amigo'** (bulb) (H3) 7
~ F1; early-cropping. Vigorous, uniform foliage; attractive, medium-sized, well-filled bulbs with good white colour

96 **'Atos'** (bulb) (H3)
~ quick-maturing with uniform, medium to large round bulbs

96 **'Carmo'** (bulb) (H3)
~ F1 hybrid. Quick-maturing with medium-sized, round, fine quality bulbs

96 **'Dover'** (bulb) (H3)
~ early with large roundish bulbs. Moderate uniformity

96 **'Heracles'** (bulb) (H3)
~ quick-maturing. Medium large, slightly flattened bulbs of excellent quality

05 **'Pronto'** (bulb) (H3) 3
~ early-cropping; attractive, medium-sized, flat, well-filled bulbs with good white colour

05 **'Victorio'** (bulb) (H3) 10
~ F1; good crop of solid, well-filled, attractive bulbs with uniform shape; tends to be greenish-white in colour

96 **'Zefa Fino'** (bulb) (H3) 1-4-6 13-31
~ quick-maturing. Medium large, round, very uniform bulbs of excellent quality

GARLIC (*Allium sativum*)

04 **'Arno'** (H4) 4-33
~ attractive white with smooth skin for July cropping. Soft neck, stores well, good yield, even size; also performed well at Harlow Carr

04 **'Cristo'** (H4) 4-33
~ soft neck. Uniform crop of attractive, white-skinned bulbs; high yield. Also performed well at Harlow Carr

04 **'Early Wight'** (H4) 10-15
~ very early crop (during May); good fat cloves. Hard neck; best used immediately after harvest

04 **'Echo'** (H4)
~ late. Hard neck; tidy, good fat purple-skinned cloves; milder flavour; uniform; high yield. Also performed well at Harlow Carr

04 **'Germidour'** (H4) 33
~ late-maturing, virus-free selection. Soft necks; well-packed, purple-skinned cloves

04 **'Ivory'** (H4)
~ early. Soft neck; large, well-formed cloves. Also performed well at Harlow Carr

04 **'Long Keeper'** (H4) 8-11
~ soft neck; uniform bulbs; good size and high yield. Also performed well at Harlow Carr

04 **'Solent White'** (H4) 6-9-14-15-18
~ late. Soft neck; many purple-skinned, very attractive cloves, with appealing bouquet; high yield; keeps beyond Christmas (up to March). Also performed well at Harlow Carr

04 **'Spring Wight'** (H4)
~ early. Purple, soft neck; uniform, clean cloves. Also performed well at Harlow Carr

04 **'Wight Cristo'** (H4) 10
~ soft neck; uniform bulbs with attractive purple cloves; variable but with a satisfactory yield. Also performed very well at Harlow Carr and Rosemoor

KALE, CURLY – see borecole

KOHLRABI (*Brassica oleracea* Gongylodes Group)

97 **'Adriana'** (H3)
~ good quality, flattened globe shape; uniform, green, small to medium size. For an open pollination type, quick-maturing

93 **'Domino'** (H3)
~ early, for cultivation under frames

06 **'Erko'** (H3)
~ open-pollinated. Early, uniform bulbs that fill quickly. Short tops. Crisp flesh with mild, sweet flavour

06 **'Kolibri'** (H3) 1-7-16-22-23
~ hybrid; uniform crop of purple, decorative bulbs with crisp flesh and good flavour. Medium-sized tops

97 **'Kongo'** (H3)
~ F1 hybrid. Exceptional quality; green, very rapid grower, very sweet and moist, with high yield and attractive short leaves

06 **'Korist'** (H3) 16-22-23-32
~ hybrid; very early crop of good-sized, tender, juicy bulbs with a mild flavour

06 **'Lanro'** (H3) 6-9-14 **15-31**
~ hybrid; smaller bulbs with sweet, tender flesh. Suitable for 'baby veg' production

06 **'Olivia'** (H3) 7 **12**
~ hybrid; uniform crop of very tender, juicy bulbs that have a sweet, fresh flavour. Medium tops with slender petioles

97 **'Quickstar'** (H3) 1-3
~ F1 hybrid. Uniform crop of juicy, tender bulbs with a mild flavour. Medium-sized tops. Reconfirmed after trial 2006

97 **'Rapidstar'** (H3) 1
~ F1 hybrid. Very uniform; green; medium to large and flattened

LEEK (*Allium porrum*)

Early maturing leek

00 **'Autumn Giant 2 – Porvite'** (H4) 1-10-15
~ dark green erect flags; uniform, solid, long shafts; slight bulbing, high yield, low levels of rust

00 **'Autumn Mammoth 3 – Firena'** (H4)
~ dark green erect plants, with a good yield of well-blanched leeks. Some bolters from early sowing; little bulbing and low levels of rust

00 **'Brecon'** (H4)
~ F1 hybrid. Uniform, dark green, erect, with long smooth shafts and no bulbing

00 **'Carlton'** (PBR) (H4) 6-7-9
~ F1 hybrid. Plants with mid to dark green flags and good uniformity. Above average bolting

00 **'King Richard'** (H4) 1-4-10
~ very long shafts with pale green flags; high yields with low levels of bolting

00 **'Mammoth Blanch'** (H4) 2-14-15-18-20-21-22-30-30
~ a show variety suitable for December sowing. Early-maturing, with high yields of well-shaped leeks with pale green flags, long, heavy shafts and no bolters

00 **'Pancho'** (H4) 1-2-6-32
~ good early yield of medium long, mid green, solid shafts with only slight bulbing. Little rust

00 **'Swiss Giant – Prelina'** (H4) 1
~ pale flags with a good yield; some rust

00 **'Swiss Giant – Tilina'** (H4)
~ very high yield of medium to long, slightly bulby leeks with slight bolting

00 **'Upton'** (PBR) (H4)
~ F1 hybrid. Uniform, very dark green flags with no bulbing and very little bolting and rust

Maincrop leek

02 **'Apollo'** (H4) 3-8
~ F1 hybrid; smooth, with slightly pale green leaves; high December yield

93 **'Autumn Mammoth 3 – Cobra'** (H4)
~ mid-season to late. Short to medium with dark green flags, but below average uniformity

93 **'Autumn Mammoth 3 – Enak'** (H4)
~ early to mid-season. Medium long, well-blanched, with mid to dark green, erect flags

93 **'Blauwgroene Herfst – Profina'** (H4)
~ early to mid-season. Medium to long, erect, slim shafts with dark green flags and some bulbing

93 **'Blauwgroene Herfst – Verina'** (H4)
~ early. Medium length with mid-green flags and little bulbing

02 **'Blue Green Autumn – Conora'** (H4) 1
~ medium length; smooth straight shanks with mid-green leaves

02 **'Blue Green Autumn – Poristo'** (H4) 11
~ long clean shanks, good length of blanch, dark green flag, good yield

02 **'Blue Green Winter – Laura'** (H4) 1
~ medium-length, well-blanched and slightly bulby

93 **'Giant Winter – Catalina'** (H4) 1
~ mid-season to late. Uniform short shafts with dark green flags

02 **'Kajak'** (H4) 1
~ quite short shanks; uniform, well-blanched, dark green leaves

93 **'Longbow'** (H4) 1-3-22
~ mid-season. Uniform, medium-length, slightly bulby leeks

02 **'Mammoth Pot'** (H4) 14-15-18
~ uniform, with whole stem blanched and light green flag. High December yield. A good short garden plant

02 **'Oarsman'** (H4) 1-8-10-14-15-22-32 **14**
~ F1 hybrid; erect plant, with very straight shank, uniform, smooth; flag leaf clean

00 **'Swiss Giant – Jolant'** (H4) 1-4-5-14-18-20-21-22-30
~ for December cropping; high yield; medium to dark green flags; long, solid shafts with little bulbing and very few bolters. Low levels of rust infection. Reconfirmed after trial 2002

02 **'Toledo'** (H4) 1-6-14-15
~ late. Uniform, medium to long, smooth shanks, with dark green flags

93 **'Winterreuzen – Granada'** (H4)
~ late. Uniform, with dark green flags; tends to split

LETTUCE (*Lactuca sativa*)

Butterhead, for spring cropping under protection

97 **'Beverley'** (PBR) (H3)
~ produces small, solid, mid-green heads with rapid growth

00 **'Cynthia'** (H3)
~ well-hearted, mid-green, uniform, good shape

00 **'Oskar'** (H3)
~ very good quality; heavy heads; very clean, very uniform, medium to large frame; dark green, attractive, well-hearted, thick-leaved

00 **'Ravel'** (H3) 1
~ early, well-hearted, thick-leaved variety; medium dark green, with fairly erect leaf

00 **'Ricardo'** (H3) 1
~ firm-hearted

00 **'Tzigane'** (H3)
~ nice open-hearted, uniform, medium to large frame; dark green, clean base

Butterhead, for summer cropping in the open garden

02 **'Cassandra'** (H3) 1-10
~ slower to mature; large, tidy frame, with short internal stem and pale to mid green leaves

02 **'Diana'** (H3) 1-14-15
~ slower to mature; large frame, with short internal stem and leafy, uniform, mid to dark green heads

02 **'Enya'** (H3) 1
~ uniform, dense, well-hearted, tidy heads. Good garden variety

02 **'Fatima'** (H3) 10
~ large frame; uniform, dense, pale to mid green, well-hearted heads

93 **'Lilian'** (H3) 1-14
~ round, well-filled heads, with smooth mid-green leaves. Reconfirmed after trial 1997 and 2002

02 **'Mikola'** (H3) 1
~ 'Marvel of Four Seasons' type; medium-sized frame; tidy heads with green, bronze-tipped leaves and solid hearts. Slow to bolt. Reconfirmed after trial 2003

02 **'Plenty'** (PBR) (H3)
~ uniform, pale to mid green, with tidy, well-filled hearts

02 **'Roxy'** (H3) 1 **12-13-31**
~ 'Marvel of Four Seasons' type; very uniform, attractive, medium to dark green bronze-tipped leaves. Slow to bolt. Reconfirmed after trial 2003

02 **'Sangria'** (H3) 7-9
~ a large frame; soft, loose, pale green leaves, tipped pinkish-red; good uniform hearts; slower to mature. Reconfirmed after trial 2003

02 **'Titan'** (PBR) (H3)
~ mid-green, well-hearted, tidy heads; slower to mature. Good garden variety

Butterhead, for autumn cropping under protection

97 **'Avondefiance'** (H3) 1-14
~ medium to large mid-green heads

97 **'Beverley'** (PBR) (H3)
~ produces small, solid, mid-green heads with rapid growth

97 **'Clarion'** (H3) 1-3-7
~ open heads, with pale to mid green leaves. Reconfirmed after trial 2002

00 **'Ricardo'** (H3) 1
~ firm-hearted

97 **'Sunny'** (PBR) (H3) 1-3
~ a good-sized lettuce; very early and quick-maturing. Reconfirmed after trial 2002

Cos lettuce

99 **'Attico'** (PBR) (H3) 1-23
~ early. Mid to dark green 'Little Gem' type with dense heads

99 **'Bubbles'** (H3) 1-32
~ small heads with dark green crinkly leaves

93 **'Corsair'** (H3) 1-10-14
~ vigorous large frame with mid to pale green slightly blistered leaves

99 **'Cosmic'** (H3) 1
~ medium size with pale to mid green slightly blistered leaves

99 **'Crisp Mint'** (H3)
~ very fast growing; crinkly leaf and well-filled heart

99 **'Darkland Cos'** (H3)
~ not too blistered; good standing; uniform, nice even medium dark green colour

00 **'Density'** (H3) 1
~ semi-Cos with leafy, erect habit; dark green, very uniform

03 **'Exbury'** (H3) 1-14
~ Cos type with very bright red, glossy, erect leaves

93 **'Jewel'** (H3) 1-14
~ larger than 'Little Gem' with slightly more blistered leaves. Reconfirmed after trial 1999

99 **'Kendo'** (PBR) (H3)
~ a red-leaved 'Little Gem' type. Reconfirmed after trial 2000

99 **'Little Gem Pearl'** (H3) 1-7-10-14-34
~ 'Little Gem' type but with paler green, more blistered leaves

93 **'Little Gem'** (H3) 1-2-3-4-5-6-7-8-9-10-11-13-14-15-18-20-21-26-30 **12-14-15-17-19-31-35**
~ small solid heads with mid green, medium-blistered leaves. Reconfirmed after trial 1999

99 **'Little Leprechaun'** (H3) 1-4-5-13-20-21 **19**
~ semi-Cos with dark red leaves

93 **'Lobjoit's Green Cos'** (H3) 1-2-7-9-14-15-20-21-25-30 **14**
~ large, rather open heads, with relatively smooth mid-green leaves. Reconfirmed after trial 1999

03 **'Nymans'** (H3) 1-7-15-32
~ midi-cos. Very attractive, deep red colour on glossy leaves. Slow to bolt

03 **'Pandero'** (H3) 1-6-9-10
~ 'Little Gem' type. Very attractive, uniform plants; small frame, with leaves flushed deep red over dark green

99 **'Parris Island'** (H3) 1-4-22-23 **9-12-13-31**
~ vigorous with pale green uniform heads

99 **'Pinokkio'** (H3) 1-6-8 **12-13-15-17-20-21-31**
~ medium-sized, dark green

99 **'Romany'** (H3) 1-8-14
~ early to mature. A round-edged, well-turned leaf; some mildew resistance

99 **'Verte Maraichere'** (H3) 25
~ a very old variety; erect, medium to pale leaves with slight blistering

Crisphead lettuce

94 **'Beatrice'** (H3) 1
~ small to medium-sized mid-green leafy heads; early to mature

01 **'Blush'** (H3) 1
~ a baby iceberg with slight red blush on grey-green outer leaves

01 **'Challenge'** (PBR) (H3)
~ very large solid hearts; mid to dark green leaves

01 **'Court'** (H3)
~ compact and early

01 **'Dickinson'** (H3) 1-6-26
~ medium to large frame, solid well-filled heads; early

94 **'Kelvin'** (PBR) (H3)
~ greyish-green solid hearts which are early to mature

93 **'Lakeland'** (H3) 1-3-6-7-8-11-14 **14**
~ large frame with well-hearted heads and bright green leaves; later to mature

94 **'Leopard'** (H3)
~ large frame with well-filled heads

- 94 **'Malika'** (H3) 1
~ early. Small-framed, dark green well-filled heads
- 94 **'Minigreen'** (H3) 1
~ early. Uniform, attractive heads with well-formed hearts. Reconfirmed after trial 2001
- 01 **'Robinson'** (PBR) (H3) 1-15-18-22
~ medium to large frame, good quality solid hearts
- 94 **'Roxette'** (PBR) (H3)
~ shorter-leaved type with tidy, solid hearts
- 01 **'Set'** (PBR) (H3) 1-8-9
~ medium to large size; an early, solid, heavy lettuce
- 03 **'Sioux'** (H3) 1-7
~ smooth leaves, large frame, with a green heart and outer leaves tipped red. Slow to bolt
- Leafy lettuce**
- 03 **'Barosso'** (H3)
~ Batavian type; vigorous large frame with a bright red tinge
- 03 **'Bijou'** (H3) 7-8
~ Batavian type with attractive bright red glossy colour and good flavour. Uniform plants with a fairly small frame; slow to bolt. For ornamental use also
- 95 **'Black-seeded Simpson Improved'** (H3)
~ yellow-green leaves with frilled edges. Cos-like in growth
- 95 **'Catalogna'** (H3) 1-4-7-12-13-15
~ strong-growing oak-leaved type. Light green slightly blistered leaves
- 03 **'Cerize'** (H3)
~ oak-leaved type. Uniform plants with a large frame and attractive deep, bright cherry-red leaves. Slow to bolt
- 95 **'Cocarde'** (H3) 1-4-5-13-20-21-23 **19-35**
~ large oak-leaved type, with bronze green-tinged leaves
- 95 **'Cordoba'** (H3)
~ a darker 'Lollo Rossa' type. Tightly frilled
- 03 **'Delicato'** (H3) 7
~ oak-leaved type with attractive cherry-red colour. Uniform plants; slow to bolt
- 95 **'Ferrari'** (H3)
~ an oak-leaved type. Frilled with heavily bronzed outer leaves
- 95 **'Frillice'** (PBR) (H3) 8
~ small-growing plants with heavily serrated dark green leaves
- 95 **'Frisby'** (H3)
~ compact growth with mid-green tightly frilled leaves
- 95 **'Ibis'** (H3)
~ Batavian type; medium to large framed, mid to dark green, blistered leaves with bright bronze leaf tips; good flavour. Reconfirmed after trial 2003
- 95 **'Impuls'** (H3)
~ 'Lollo Rossa' type with tightly frilled bronzed and red leaves
- 95 **'Krizet'** (H3)
~ 'Salad Bowl' type with light green frilled leaves
- 03 **'Lollo Rossa – Assor'** (H3)
~ Lollo Rossa: a selection with a large frame and pale green leaves, tipped pink. Uniform plants
- 95 **'Lollo Rossa'** (H3) 1-2-4-5-6-7-9-10-11-13-14-20-21-22-27-30 **14-15-17-19-31-35**
~ round, medium-sized plants with green-centred leaves and bronzed frilled outer leaves
- 95 **'Loros'** (H3)
~ a slightly smaller-growing 'Lollo Rossa' type
- 95 **'New Red Fire'** (H3) 1-4-15
~ large, with puckered light bronze outer leaves
- 03 **'Nika'** (H3) 3
~ 'Lollo Rossa' type; medium red leaf, plants slow to bolt; good mildew resistance
- 03 **'Pentared'** (H3)
~ seaweed-leaved lettuce, so named because deeply cut leaves separate easily when stalk base cut off. Attractive dark leaves, very slow to bolt. Also for ornamental usage
- 95 **'Raisa'** (H3)
~ compact oak-leaved type with bronze and frilled out leaves
- 95 **'Red Ruffles'** (H3)
~ large oak-leaved type, open-hearted with bronze blistered leaves
- 95 **'Red Salad Bowl'** (H3) 1-2-4-6-9-14-15-21-27-30 **5-12-13-14-17-19-20-21-31-35**
~ large oak-leaved type. Green leaves flushed with red on the edge
- 03 **'Rusty'** (H3) 1-9-15
~ midi-cos, uniform, with a small erect frame. Dark emerald, blushed leaves
- 95 **'Salad Bowl'** (H3) 1-2-4-6-8-9-10-14-20-21-30 **5-12-13-15-17-20-21-30-31-35**
~ large open-hearted plants with light green frilled leaves
- 95 **'Sesam'** (PBR) (H3)
~ a smaller-growing darker-leaved 'Lollo Rossa' type
- 95 **'Sunburst'** (H3)
~ a medium-sized cabbage lettuce with deep red/bronze outer leaves
- MANGETOUT – see pea, mangetout**
- MARROW (*Cucurbita pepo*)**
- 97 **'Badger Cross'** (H3) 1-6-8-22-26-34 **12-14-15-31**
~ F1 hybrid. Later bush variety; small, good shape with dark-striped fruits. Claimed CMV tolerance
- 97 **'Clarita'** (H3) 1-8
~ F1 hybrid; early cropping. High yield of pear-shaped, green-white fruits. Needs cutting when small
- 97 **'Minipak'** (H3) 1-5-12-13-20-21
~ later bush variety; small dark striped fruits
- 97 **'Tiger Cross'** (H3) 1-4-5-7-9-10-11-14-15-20-21-30 **14-31**
~ F1 hybrid. High yield of pale-striped fruits. Claimed CMV tolerance
- MELON (*Cucumis melo*)**
- 93 **'Amber Nectar'** (H2)
~ oval fruit of good size. Ripe fruit flesh is orange with very good flavour
- 99 **'Durandal'** (H2)
~ F1 hybrid; early to mid-season. Flattened globe-shaped fruit with faint grooves and heavy cork netting; flesh orange when ripe
- 99 **'Early Dawn'** (H2) 14
~ F1 hybrid; early ripening. Oval fruit with dark green grooves and heavy cork netting; flesh orange when ripe
- 99 **'Edonis'** (H2) 10
~ F1 hybrid; early ripening. Oval to globular fruit with dark green grooves and heavy cork netting; flesh orange when ripe
- 93 **'Ogen'** (H2) 2-3-14-15-20-21-30-31
~ oval-round fruit; yellow-green flesh
- 93 **'Sweetheart'** (H2) 1-2-3-4-6-7-8-9-11-12-14-15-20-21-30
~ early ripening; globular, medium-sized, cream-coloured fruit with orange flesh

ONION (*Allium cepa* unless otherwise stated)
Salad onion – non bulbing with strong flavour (*A. fistulosum* and hybrids)

- 96 **'Beltsville Bunching'** (H3)
~ tall stems with a good length of blanch
- 96 **'Emerald Isle'** (H3)
~ medium strong stems; very uniform
- 04 **'Emerald Star'** (H3)
~ F1 hybrid. Medium-green leaf with good contrast between leaf and blanch stem. Slow to bolt
- 96 **'Feast'** (H3) 10-34
~ F1 hybrid. Medium to dark green, erect leaves; well-blanching bases; slow to bolt. Reconfirmed after trial 2004; also performed well at Harlow Carr
- 04 **'Guardman'** (H3) 1-3-6-8-11-14-15-22 31-35
~ F1 hybrid: cross between *A. fistulosum* and *A. cepa*. Medium to dark green leaves. Very vigorous; well-blanching with some bulbing. Also performed well at Harlow Carr
- 96 **'Ishiko'** (H3)
~ strong-growing, mid to dark green leaves with a good yield
- 96 **'Ishikura'** (H3) 1-3-7-10-13-15-20-21-22 19
~ strong-growing; long-stemmed
- 96 **'Laser'** (H3) 6
~ medium to dark green leaves. Uniform, vigorous, straight tops with good length of blanch. Reconfirmed after trial 2004; also performed well at Harlow Carr
- 04 **'Long White Koshigaya'** (H3) 1
~ uniform plants with erect, slender, medium to dark green leaves; long blanch; slow to bolt. Also performed well at Harlow Carr
- 04 **'Parade'** (H3) 1-3-14-26 12-31
~ very straight, strong-growing, uniform plants with good length of blanch; slow to bolt. Also performed well at Harlow Carr
- 04 **'Photon'** (H3) 5
~ neat, uniform plants, with dark green tops and long blanch
- 96 **'Savel'** (H3) 1
~ long stems with a good length of blanch
- 04 **'Summer Isle'** (H3) 1-10
~ late. Erect, vigorous, uniform plants, with a good length of blanch. Also performed well at Harlow Carr
- 96 **'White Spear'** (H3) 1
~ long slender stems with dark green leaves

Salad onion – traditional; can be bulby; mild flavour; can be winter hardy

- 04 **'Deep Purple'** (H3) 11
~ vigorous plants with bright, medium-green leaves; of good shape. Attractive deep red-purple colour to base
- 04 **'Elody'** (H3) 7
~ strong plants, producing slightly bulbous onions. Good blanch
- 04 **'Lilia'** (H3) 6-10
~ dark green leaves with attractive deep red base. Tends to be bulby. Also performed well at Harlow Carr
- 96 **'Ramrod'** (PBR) (H4) 1-7-14-22 9-14-12-13-15-31
~ later-cropping. Versatile cropper with medium-green leaves and a good length of blanch. Reconfirmed after trial 2004
- 93 **'White Lisbon'** (H4) 1-2-3-4-5-6-7-8-9-10-11-13-15-18-20-21-25-26-30-32 10-12-14
~ medium-green leaves with good length of blanch. Good for early and successional sowing. Reconfirmed after trial 2004
- 93 **'Winter Over'** (H4) 1-15-30
~ dark green leaves, with high yields; may become bulby. Overwinters well
- 93 **'Winter White Bunching'** (H4) 1-14
~ strong-growing with dark green leaves. Overwinters well

Maincrop bulb onion

- 93 **'Golden Bear'** (H3) 1-4-12-20-21-22-26
~ F1 hybrid; early. Thin-skinned, high-shouldered bulbs; do not store well
- 95 **'Goldito'** (H3)
~ F1 hybrid. Dark straw-coloured bulbs with thick skins; store well
- 93 **'Hygro'** (H3) 1-2
~ F1 hybrid. Good yields of thick-skinned straw-coloured bulbs; store well
- 95 **'Hyton'** (H3) 1
~ F1 hybrid. Good yields of dark straw-coloured bulbs; store well
- 95 **'Marco'** (H3) 1-2-8-15-16-22-26-32
~ F1 hybrid. Flattened globe-shaped bulbs; store well
- 95 **'Rijnsburger 5 Balstora'** (H3) 3
~ thick-skinned, dark straw-coloured bulbs; store well
- 95 **'Unwins Exhibition'** (H3) 1
~ an exhibition onion suitable for January sowing under heated conditions

Overwintered bulb onion, grown from seed

- 93 **'Buffalo'** (H4) 1-16
~ F1 hybrid. Good yields of flattened globe-shaped bulbs with thin skins

- 93 **'Imai Early Yellow'** (H4) 1-30
~ slightly flattened globe-shaped bulbs; dark straw-coloured, with fairly thick skins

Bulb onions grown from sets

- 02 **'Autumn Gold Improved'** (H3)
~ uniform, excellent size, with good skin and colour; good yield
- 93 **'Centurion'** (H3) 6-9-15-16-22 15-31
~ F1 hybrid. Flattened globe-shaped bulbs with straw-coloured skins of good thickness. Reconfirmed after trial 2002
- 02 **'Hercules'** (H3) 10-16
~ F1 hybrid; slightly elongated bulbs with good skin. No bolters
- 93 **'Jagro'** (H3) 15
~ F1 hybrid. Good yield of globe-shaped bulbs, with good skin; later ripening. No bolters. Reconfirmed after trial 2002
- 93 **'Jetset'** (H3) 10 12-31
~ F1 hybrid; early. Uniform, flattened globe-shaped bulbs with thick, yellow-brown skins
- 02 **'Setton'** (PBR) (H3) 3-4-6-7-9-10-11 15-31
~ F1 hybrid. Good yield, with good dark skin
- 02 **'Sturon'** (H3) 2-3-6-7-9-10-15-20-22-30 12-13-15-31
~ very good yield of globe-shaped, slightly high-shouldered bulbs, with good yellow-brown skins. Reconfirmed after trial 2002
- 93 **'Turbo'** (H3) 12-20-21-30
~ globe-shaped to slightly conical bulbs with brown skins. Some skin splitting
- Red, from seed or sets**
- 05 **'Red Baron'** (H3) 2-3-4-8-10-11-13-15-16-20-21-22-30 12-15-31
~ high yield of attractive, dark-skinned, globe-shaped bulbs with good internal colour. Plants in the trial grown from seed produced a higher yield and bolder bulbs than those grown from sets
- 05 **'Red Spark'** (H3) 1
~ attractive globe-shaped, uniform, medium-sized bulbs with tight, dark skins and good internal colour
- Shallot**
- 93 **'Atlantic'** (H3)
~ medium to large bulbs with thin, straw-yellow skins. Reconfirmed after trial 2001
- 01 **'Delvad'** (PBR) (H3) 6-9
~ uniform bulbs with thick reddish brown skins
- 93 **'Giant Yellow Improved'** (H3)
~ uniform, large bulbs with bright, pale brownish skins. Very good yield

- 01 **'Golden Gourmet'** (H3)
3-6-9-10-13-20-21-22-30
~ well-shaped, good size; high yield
- 01 **'Jermor'** (H3) 4-6-8-9-10-11-15-30
~ good skin, uniform shape and size;
suitable for exhibition
- 01 **'Longor'** (PBR) (H3) 10 **12-31**
~ good yield and shape; also suitable for
exhibition
- 01 **'Matador'** (H3) 1-2-22
~ F1 hybrid; thick skins, and good yield
- 93 **'Pikant'** (H3) 4-8-10
~ bulbs well-protected by many layers of
reddish brown skins. Reconfirmed after
trial 2001
- 93 **'Santé'** (H3) 3-20-21-30
~ attractive, reddish brown, uniform
bulbs with smooth skins. Plant a month
later than others to avoid bolting
- 93 **'Success'** (H3)
~ reddish brown bulbs with good skins
- PARSLEY (*Petroselinum crispum*)**
- 97 **'Bravour'** (H4) 1-14-15-22-30
~ a reliable cropper, good stalks, well
curled
- 97 **'Curlina'** (H4) 6
~ compact and uniform; tightly curled
- 97 **'Decora'** (H4)
~ uniform; dark green curled
- 97 **'Envy'** (H4) 1-9
~ uniform; mid-green curled
- 97 **'Favorit'** (H4) 1-9
~ very even; dark green and nicely
curled
- 97 **'Garland'** (H4) 1-23
~ good vigorous growth; mid-green
curled
- 93 **'Moss Curled 4 – Afro'** (H4)
~ well curled, dark green
- 93 **'Moss Curled'** (H4) 2-3-4-5-6-7-8-9-10-14-
20-21-25 **9-13-15-17-19-31-35**
~ well curled
- PARSNIP (*Pastinaca sativa*)**
- 93 **'Cobham Improved Marrow'** (H4) 1-6-
8-14
~ wedge- and bayonet-shaped roots with
smooth skins; good canker resistance.
Reconfirmed after trial 2001
- 01 **'Countess'** (H4) 1-3-6-7-8-15-16-20-
21-22-31
~ F1 hybrid; smooth skin, shallow
crowns, pale cream colour
- 01 **'Dagger'** (H4) 10-14-26
~ F1 hybrid; a smooth parsnip with a
shallow crown, very uniform
- 01 **'Excalibur'** (H4) 10-26
~ F1 hybrid. A long cream-coloured
parsnip with a smooth skin; uniform
shape
- 01 **'Gladiator'** (H4) 1-2-3-7-9-10-11-12-13-14-
15-16-20-21-22-23-26-30-32-35 **14**
~ F1 hybrid; very smooth skin, good
potential yield, uniform shape, shallow
lenticels
- 93 **'Javelin'** (H4) 1-3-10-14-15-16-22-23-26-34
~ F1 hybrid. Wedge-shaped; yields well.
Good canker resistance
- 93 **'Tender and True'** (H4) 1-2-3-4-6-7-8-9-
10-13-14-15-20-21-2-31 **12-17-19**
~ long roots of mixed size
- 01 **'White Spear'** (H4) 14-15 **14**
~ uniform shape, shallow lenticels,
smooth skin, good white colour
- PEA (*Pisum sativum*)**
- 98 **'Ambassador'** (H3) 1-7-9-17-20-21 **3-9-
12-15-31**
~ maincrop; medium-sized twin pods,
easy to pod; good yield with even distri-
bution
- 05 **'Balmoral'** (PBR) (H3) 10
~ late maincrop; dark-foliaged plant
produces a heavy crop of double and
triple pods per node. Short pods have
an average of seven peas per pod, with
good sweet flavour
- 04 **'Banff'** (H3) 1
~ early crop of double pods per node
with an average of 7 big peas per pod;
good flavour
- 97 **'Bayard'** (H3)
~ early; a good crop with an average of
8 peas per pod; plants semi-leafless and
therefore easy to pick
- 93 **'Cavalier'** (H3) 1-3-8-12-14-15-26 **14-15**
~ AGM awarded to Tozers maintenance
only. Maincrop; long straight pods,
mostly paired; variable maturity there-
fore good for garden use. Reconfirmed
after trial 1998
- 98 **'Cockpit'** (H3)
~ maincrop; semi-leafless with very long
pod; well-filled with a good colour
- 05 **'Dorian'** (PBR) (H3) 11-32
~ early maincrop; good crop of easy to
pick, very long, straight pods. Plants not
too tall; produce mainly double pods
per node that contain an average of
nine big, well flavoured peas
- 93 **'Early Onward'** (H3) 1-2-3-5-6-8-9-11-
12-14-15-20-21-30-31
~ early, high yield of blunt-ended pods
borne in pairs
- 05 **'Greensage'** (H3) 1-3-8-9-10-13-20-21-30
~ maincrop; strong-growing, semi-
leafless plants produce easy to pick,
mainly double pods per node. Long
pods have an average of ten big sweetly-
flavoured peas per pod
- 98 **'Griffin'** (H3) 1
~ maincrop; dark green, with small to
medium pods in twos or threes; good
flavour
- 97 **'Holiday'** (H3)
~ early; a good cropper; long pods with
8 very sweet peas per pod; easy to pick
- 97 **'Hunter'** (H3)
~ early; a heavy cropper with pods over
the whole of the plant; an average of 8
peas per pod
- 93 **'Hurst Greenshaft'** (H3) 2-3-4-5-6-7-8-9-
10-11-14-15-22 **19**
~ maincrop; heavy yield of dark green,
medium-length, pointed pods. Average
of nine good-flavoured peas per pod.
Reconfirmed after trial 1998, 2005
- 05 **'Jaguar'** (H3) 1-3-4-10-14
~ early maincrop; heavy crop of mainly
double pods per node. Medium-length
pods have an average of seven peas per
pod, with good flavour
- 97 **'Kelvedon Wonder'** (H3) 1-2-3-5-7-6-8-9-
10-11-12-14-15-20-21-25-27-30
12-19-31
~ early maincrop. Long, dark green
pods, with an average of 7-8 peas per
pod. Reconfirmed after trial 2004, 2005
- 97 **'Little Marvel'** (H3) 1-2-6-7-9-12-14-20-21-
25
~ early-maturing, good-flavoured pea,
easily shelled with an average of 7 peas
per pod
- 04 **'Misty'** (PBR) (H3) 1-10
~ early. Compact plants; good crop of
double pods per node; pods evenly set,
with an average of 6 peas; good flavour
- 98 **'Oasis'** (PBR) (H3)
~ maincrop; a later-maturing variety.
Cropped well; blunt-ended pods
- 98 **'Onward'** (H3) 1-2-3-5-6-7-8-9-10-11-12-
14-15-18-20-21-30-31-35
~ first of the main crop with a high
yield and good flavour
- 98 **'Oregon Trail'** (H3)
~ maincrop; good habit; short pods.
Good yield over a long picking period

- 98 **'Rondo'** (H3) 1-7-10 **12-13-15-17-27-31**
~ maincrop; large, broad, straight, pointed pods
- 98 **'Saturn'** (H3)
~ maincrop; a heavy cropper, not too tall, with dark green foliage; a long picking period
- 05 **'Serge'** (PBR) (H3) 3
~ maincrop; semi-leafless plants produce a heavy crop of easy to pick pods. Medium-length pods have an average of ten peas per pod, with good flavour
- 98 **'Show Perfection'** (H3) 1-2-15-16-18-20-21-22-23-26-30
~ maincrop; an 'exhibition' pea, very tall with long dark green pods. A high yield over a long period
- 04 **'Spring'** (H3) 3-8
~ early crop from compact plants. Single and double pods per node. Pods evenly set, with average of 6 peas; good flavour
- 05 **'Starlight'** (PBR) (H3) 10-12
~ early maincrop; heavy crop for picking over a long period. Blunt, medium-length pods are easy to see and pick. Mainly double, but also several triple pods per node. Short pods have on average seven peas per pod, with good sweet flavour
- Mangetout pea**
- 00 **'Delikata'** (H3) 7-8-11-14-15
~ tall, with similar pods to 'Oregon Sugar Pod'. A shade earlier and carries a heavy crop. Pods soon form strings if not picked regularly. Mildew and fusarium resistant
- 93 **'Edula'** (H3)
~ fairly dwarf habit with a good crop of curved fleshy pods
- 00 **'Norli'** (H3) 1 **12-13-15-17-30**
~ medium height. About the earliest maturing and a heavy cropper but over a short period and so requires successional sowing. Stronger flavour than 'Oregon Sugar Pod'
- 93 **'Oregon Sugar Pod'** (H3) 1-2-3-4-6-7-8-9-10-14-20-21-31-32
~ AGM awarded to Bakker maintenance only. Medium length, with flushes of broad, flat pods over an extended picking period. Must be picked while young and stringless. Reconfirmed after trial 2000
- 93 **'Reuzensuiker'** (H3) 7
~ medium height, pods larger, broader and more fleshy than 'Oregon Sugar Pod' with a concentrated set high on the plant

- 00 **'Snow Wind'** (PBR) (H3)
~ semi-leafless type producing sweet, dark green pods. Good crop over a long picking season. Would be self-supporting if grown in a block instead of rows

SUGAR DWARF SWEET GREEN see 'Norli'

Sugarsnap pea

- 00 **'Cascadia'** (H3) 1
~ dwarf habit producing very fleshy, crisp, sweet pods, which remain tender and sweet over a longer period than many snaps. Heavy crops over a long picking season
- 00 **'Delikett'** (H3) 1-4-6-7-9-11-13-18-20-21
~ dwarf habit. Young, dark green pods stringless but soon form strings; become fleshier and sweeter with age. Very well cropped and a long season of picking
- 00 **'Sugar Ann'** (H3) 1-6-7-10-11-14-17-14-15-31
~ medium height. Very early maturing with a huge crop of pale green pods of succulent, sweet taste
- 00 **'Sugar Lord'** (PBR) (H3)
~ very tall vigorous plant; extremely high yield of uniform good-coloured pods

POTATO (*Solanum tuberosum*)

Potato (1st early)

- 98 **'Accent'** (PBR) (H3) 4-6-8-9-10-15-20-21-24-4-15-31
~ a super-tasting 'new potato', with pale creamy-yellow waxy flesh. Eelworm and common scab resistance
- 93 **'Concorde'** (H3) 24
~ long oval yellow tubers with waxy yellow flesh. Eelworm resistant. Reconfirmed after trial 1998
- 98 **'Foremost'** (H3) 4-7-8-9-10-15-20-22-24-28-30
~ originally 'Suttons Foremost'. Ever popular 'new potato' with slightly waxy, firm, white, good-flavoured flesh that does not discolour or disintegrate on cooking
- 98 **'Red Duke of York'** (H3) 3-4-9-10-15-24-28-4-10-12-15-31
~ oval red sport of 'Duke of York' with moist pale yellow flesh of superb flavour. Excellent roasted but a good all-rounder as tubers bulk up quickly if left to mature as a late Second Early
- 98 **'Winston'** (PBR) (H3) 3-4-6-10-15-20-22-24-28
~ bulks up quickly to produce large, even-shaped tubers. Creamy moist flesh of excellent flavour which does not discolour on cooking

Potato (2nd early)

- 98 **'British Queen'** (H3) 4-10-15-24-28-4-15-31
~ heavy and uniform crop of white-skinned and floury-textured tubers of delicious flavour for all cooking purposes
- 98 **'Dark Red Norland'** (H3) 24
~ dark red-skinned oval tubers and pure white flesh. Heavy cropping. Good flavour for boiling and roasting
- 98 **'Kondor'** (PBR) (H3) 4-15-21-24-28
~ large pale red-skinned oval tubers with tasty, almost waxy, yellow flesh. Very high yields. Excellent for baking
- 98 **'Lady Christi'** (PBR) (H3) 3-4-6-8-9-10-12-15-20-22-24
~ bulks up very quickly and is almost a First Early. Long oval, shallow-eyed, pale yellow-skinned and creamy flesh which remains firm on cooking. Eelworm resistant
- 98 **'Nadine'** (PBR) (H3) 3-4-7-8-10-11-15-20-21-22-24-28-30
~ exceptionally smooth skin and shallow eyes. Cream flesh with a moist, waxy texture that does not discolour on cooking. Heavy uniform yields. An exhibitor's favourite
- 93 **'Stroma'** (PBR) (H3) 24
~ long oval orange red-skinned tubers with firm yellow waxy flesh with a mild flavour; can be left as early maincrop
- Potato (early maincrop)**
- 93 **'Avalanche'** (PBR) (H3) 24
~ 'Maris Piper' as a parent gives guaranteed yields and flavour. Creamy, quite floury flesh for mash, chips and baking
- 93 **'Maxine'** (PBR) (H3) 3-4-6-8-9-10-11-15-22-24-28
~ large, smooth, pale red-skinned tubers with white waxy flesh. Uniform tubers so also recommended for exhibitors. Eelworm resistant. Reconfirmed after trial 1998
- 93 **'Navan'** (PBR) (H3) 24
~ heavy crop of oval, white-skinned and creamy white-fleshed tubers. Ideal for chips and roasting. Eelworm resistant
- 93 **'Picasso'** (PBR) (H3) 3-4-6-8-10-15-20-21-22-24-30
~ one of the heaviest croppers with creamy skin and striking bright red eyes. Waxy fine-flavoured flesh, particularly when boiled. Eelworm resistant and good resistance to common scab. Reconfirmed after trial 1998

- 98 **'Roseval'** (H3) 4-10-15-24-28 **4-12-15-31**
~ early main crop. High yield, uniform, oval tubers, attractive vivid carmine skin. Retains much of its skin colour when cooked, contrasting well with the yellow, waxy flesh; of superb flavour as a salad, hot or cold. Reconfirmed after trial 2003

Potato (salad)

- 03 **'Amandine'** (PBR) (H3) 4-10-15-24
~ first early. High yield, uniform, oval tubers, shallow eyes, pale yellow, waxy flesh
- 03 **'Annabelle'** (PBR) (H3) 4-9-15-24-28
~ first early. High yield, oval tubers, shallow eyes, waxy, yellow flesh
- 98 **'Charlotte'** (H3) 3-4-6-8-9-10-11-15-18-20-21-22-24-28-30 **4-10-12-13-15-28-31**
~ long oval variety producing yellow-skinned and waxy tubers with creamy yellow flesh of first-class flavour either hot or cold
- 03 **'Cherie'** (PBR) (H3) 4-9-10-15-24
~ good yield; pink-skinned, oval tubers. Pale yellow, waxy flesh, good flavour
- 03 **'Mimi'** (PBR) (H3) 3-4-10-15-24-28
~ maincrop. Small, round, uniform, high-quality tubers; attractive pink skin. Low yielding; suitable for pot culture
- 03 **'Pink Fir Apple'** (H3) 3-4-6-7-8-10-11-15-18-20-21-22-24-28-30 **4-12-15-31**
~ late main crop (22 weeks from planting). Very vigorous plants, elongated, knobbly tubers; good flavour
- 03 **'Princess'** (PBR) (H3) 24
~ first early. High yields; oval tubers, cream-coloured, floury flesh and good flavour
- 03 **'Ratte'** (H3) 4-8-15-24-28
~ early main crop. Oval tubers, waxy, cream flesh; good flavour
- 03 **'Shelley'** (H3) 24
~ second early. Uniform, oval tubers, shallow eyes, white flesh

RADICCHIO – see chicory**RADISH (*Raphanus sativus*)**

- 96 **'Cherry Belle'** (H3) 1-2-3-4-10-14-15-20-21-27-30 **13-15-17-19-31**
~ medium-sized leaf. Round red roots of good size
- 96 **'Cyros'** (H3) 1
~ F1 hybrid. Small leaf; round red roots of excellent colour. Reconfirmed after trial 2002
- 96 **'Flamboyant Sabina'** (H3) 1-10
~ quick-maturing red roots, small white tip

- 02 **'Flamboyant'** (H3)
~ cylindrical type; red with small white tip. Uniform, medium-sized tops
- 96 **'French Breakfast 2'** (H3)
~ uniform crimson roots with white tip
- 96 **'French Breakfast 3'** (H3) 6-7-10-11-14
~ crimson roots with one-third white tip
- 00 **'Gandar'** (H3)
~ uniform; cylindrical shape; good red colour with small white tip; attractive bunch
- 00 **'Isar'** (H3)
~ F1 hybrid; excellent size and form; round shape with erect short tops
- 00 **'Jwasprint'** (H3)
~ very uniform; globe shape; bright red colour with short tops
- 96 **'Marabelle'** (H3) 1-8
~ small leaf. Early with round red smallish roots. Reconfirmed after trial 2000 and 2002
- 00 **'Mirabeau'** (H3) 10
~ F1 hybrid. A widely grown variety with short tops; globe shape; bright red. Reconfirmed after trial 2002
- 00 **'Printo'** (H3) 26
~ F1 hybrid; excellent colour; nice round shape; medium tops
- 93 **'Ribella'** (H3) 1
~ small leaf. Round bright red roots; reconfirmed after trial 1996
- 93 **'Rondar'** (H3)
~ round bright attractive uniform roots; reconfirmed after trial 1996
- 00 **'Rougette'** (H3) 1-6-10-14
~ a very quick grower with very short tops and round shape; uniform and of good colour. Reconfirmed after trial 2002
- 02 **'Rudi'** (PBR) (H3) 1-3-10-23 **19-31**
~ round type; uniform, with good red colour; very short tops
- 02 **'Saxa'** (H3) 1-2 **9-13-15-27-30-31**
~ round type; large root, maturing early; bright red, medium-length tops
- 96 **'Scarlet Globe'** (H3) 1-5-7-9-14-20-21-25-30 **12-13**
~ round medium to large red roots
- 93 **'Short Top Forcing'** (H3) 1-14 **12-14-15**
~ small leaf. Deep round roots of excellent colour. Reconfirmed after trial 2000

- 96 **'Sparkler'** (H3) 1-2-6-7-9-14-15-20-21-30 **5-12-13-17-31**
~ AGM awarded to Unwin's maintenance only; slightly flattened round red roots with a white base
- 96 **'Summer Crunch'** (H3) 1-13-20-21
~ 'French Breakfast' type with small white tip
- 02 **'Sunto'** (H3)
~ F1 hybrid; round type; good colour, early, very short tops
- 96 **'Tinto'** (H3)
~ small leaf with large round red roots

RHUBARB (*Rheum × hybridum*)

- 03 **'Fulton's Strawberry Surprise'** (H4)
~ maincrop. Very attractive bright red colour. Strong plant, but not too vigorous for the garden
- 03 **'Grandad's Favorite'** (H4)
~ first early. Vigorous plants, high yield, thick, fairly sweet stem, bright colour, good leaf to stem ratio. Suitable for showing
- 03 **'Hawke's Champagne'** (H4)
~ second early. Compact plants, high yield potential. Attractive, bright red, medium length, uniform stems
- 03 **'Mac Red'** (H4)
~ maincrop. Strap-shaped stems; clear; whole stem has bright red colour; good flavour. A vigorous plant of good size and shape for the garden
- 03 **'Reed's Early Superb'** (H4)
~ maincrop. Long, straight, medium to thick stems, bright red colour grading to dark green, succulent and tender. Vigorous plant. Good exhibition potential
- 03 **'Stein's Champagne'** (H4)
~ maincrop. Very bold, bright red stems, with the colour along the full length. Medium vigour
- 03 **'Timperley Early'** (H4) 4-15-18
~ first early. Thick stems, early, high yield. Bred for forcing; performs very well outside, but even better colour when forced

SHALLOT – see onion**SPINACH (*Spinacia oleracea*)**

- 96 **'Atlanta'** (H3) 1-20-21 **31**
~ mid-green large round leaves. Good cropper
- 02 **'Campania'** (H3) 1-8-14
~ F1 hybrid. Quick-maturing, with mid to dark green leaves; large frame. Bulks up quickly

- 02 **'Emilia'** (H3) 1-8-14-15
~ F1 hybrid. Mid to dark green, with slightly blistered (semi-Savoy) leaves. Prostrate, slower developing plants
- 02 **'Grodane'** (H3) 1
~ F1 hybrid. Smooth, bright, mid to dark green leaves with slight blistering. Vigorous plants producing a bulky crop
- 00 **'Matador'** (H3) 1-27 **5-12-13-17-20-21-35**
~ F1 hybrid. Thick, dark green, upright leaf
- 96 **'Mazurka'** (H3) 1
~ F1 hybrid. Round, dark green leaf. Useful crop; stands well before bolting. Reconfirmed after trial 2000
- 00 **'Medania'** (H3) 1-4-13-15-20-21-22
~ slightly blistered, large round leaves. Bulked well
- 96 **'Monnopa'** (H3) 1-5-12-13 **15**
~ upright leaf habit. Round, pale green leaves and a good crop
- 00 **'Palco'** (H3) 1 **3-10-31**
~ late; mid-green, upright leaf
- 02 **'Scenic'** (H3) 9-10-27
~ F1 hybrid. Large, bright, prostrate mid-green leaves. High-yielding, with mid-season maturity. Suitable for 'cut and come again'
- 96 **'Space'** (H3) 1
~ F1 hybrid. Round, yellow-green, slightly puckered leaf. Later-maturing; stands well
- 02 **'Spartacus'** (H3) 1
~ F1 hybrid. Attractive, very dark green, blistered leaf. Tight hearts; good vigour. Fairly slow to mature. Would suit 'cut and come again' cropping
- 96 **'Spokane'** (H3) 6
~ F1 hybrid. Round, dark green leaf; smaller-growing. Later-maturing and stands well. Reconfirmed after trial 2000 and 2002
- 00 **'Tetona'** (H3) 9-10-14
~ F1 hybrid. Very upright, smooth, rounded leaf; slow-growing
- 02 **'Toscane'** (H3) 32
~ F1 hybrid. Very uniform; quite smooth, with green petioles and attractive, mid to dark green leaves. Later-maturing crop
- 93 **'Triathlon'** (H3-4) 1-8 **14**
~ F1 hybrid; early. Large, pointed, yellow-green leaves; strong-growing. An excellent crop
- 02 **'Trinidad'** (H3)
~ F1 hybrid. Upright, vigorous, dark green shiny leaf. Slightly blistered. Later to mature; well-suited to autumn cropping
- SPINACH BEET (*Beta vulgaris* subsp. *cicla* var. *cicla*) – see also chard**
- 00 **'Perpetual Spinach'** (H3) 1-2-3-4-5-6-7-8-9-10-12-13-14-15-18-20-21-22-23-25-27-30 **31**
~ mid to pale green with fairly soft texture, medium vigour
- SQUASH (SUMMER) (*Cucurbita pepo*)**
- 06 **'Clarion'** (H3) 1-4-7-20-21
~ hybrid; mid season. Healthy plants produce a high yield of attractive cylindrical fruits that are a mottled light green. Useful for stuffing if left to grow bigger
- 06 **'Eight Ball'** (H3) 1-3-6-7-14-15-16-22-30-32
~ good yield of round, green fruits; easy to see and pick from the compact, upright plants
- 06 **'Geode'** (H3) 1-6-32 **31**
~ early and heavy crop of uniform, round, mid to pale green, marbled fruits with smallish blossom end scar. Clean, healthy plants
- 06 **'Jemmer'** (H3) 1-10-13-20-21-30-34 **31**
~ hybrid; good yield of bright, light yellow, cylindrical fruits. Vigorous, healthy, upright plants with fruits that are easy to see and pick; also recommended as a courgette
- 06 **'Parador'** (H3) 1-10-14-15-23-32
~ hybrid; crops early and gives a high yield. Nicely shaped fruits are cylindrical, straight and an attractive bright yellow. Flowers are held on the fruits until completely faded. Plants are healthy and compact
- 06 **'Peter Pan'** (H3) 4
~ uniform crop of light-green, scallop-shaped fruits should be harvested when small
- 06 **'Satellite'** (H3) 1 **31**
~ hybrid; smaller, compact plants produce an early and prolific crop. Oval fruits are an attractive, vibrant dark green
- 06 **'Soleil'** (H3) 1-7-32 **15-31**
~ hybrid; early to crop. Attractive, bright yellow, cylindrical fruits with yellow stalks. Healthy, compact, productive plants
- 06 **'Sunburst'** (H3) 1-3-4-6-7-13-14-15-18-20-21
~ hybrid; attractive yellow, scallop-shaped fruits. Used for 'baby veg'; best harvested when small (5-6cm diameter)
- SUGARSNAP – see pea, sugarsnap**
- SWEDE (*Brassica napus* Napobrassica Group)**
- 02 **'Brora'** (PBR) (H4) 1-6-9-10-15
~ uniform crop; very good smooth shape and colour
- 02 **'Magres'** (H4) 10 **13-15-17-30-31-35**
~ fairly round; good size. Yellow flesh contrasts with purple skin
- 02 **'Ruby'** (PBR) (H4) 1-8-9-15-30
~ good colour skin, good yellow flesh; elongated shape with a long handle
- 02 **'Wilhelmsburger'** (H4) 1 **12-31**
~ uniform, good round shape; short handle; green skin with creamy white flesh
- SWEET CORN (*Zea mays*)**
- 96 **'Dickson'** (supersweet) (H3) 1-22
~ early to mature; tall plants, with good length cobs. Some colour variation
- 96 **'Dynasty'** (supersweet) (H3)
~ mid-season maturity. Tall plants, with long, well-filled cobs
- 03 **'Earlbird'** (supersweet) (H3) 1-6-15-32
~ F1 hybrid; 2nd early. Uniform cobs; good vigour
- 03 **'Golden Giant'** (supersweet) (H3)
~ F1 hybrid; maincrop. Vigorous, with clean foliage and large, good quality cobs
- 96 **'Golden Sweet'** (supersweet) (H3)
~ mid-season variety. Very tall plants, with medium-length cobs
- 96 **'Gourmet'** (supersweet) (H3)
~ early to mature. Tall plants with long, very well-filled cobs
- 03 **'Lark'** (extra tender sweet) (H3) 1-8-10-11-14-15-16-22-32
~ F1 hybrid; 2nd early. Plants with moderate vigour; very sweet, tender cobs
- 03 **'Mainstay'** (supersweet) (H3) 1
~ F1 hybrid; maincrop. Vigorous plants, reliable crop, well-filled cobs
- 96 **'Northern Extra Sweet'** (supersweet) (H3) 1-32
~ early to mature. Plants of medium height; good length cobs with large kernels
- 96 **'Ovation'** (supersweet) (H3) 1-3-10-14
~ early to mature. Tall plants with long cobs
- 03 **'Prelude'** (supersweet) (H3) 1-15
~ F1 hybrid; maincrop. Vigorous, high yield, with well-filled cobs

- 96 **'Start Up'** (supersweet) (H3) 1
~ quick-maturing. Plants of medium height, with medium-length cobs of fine quality
- 93 **'Sundance'** (H3) 1-6-9-14
~ early to mid-season. Short plants, with short well-filled cobs
- 03 **'Swallow'** (extra tender sweet) (H3) 14
~ F1 hybrid; well-filled, shorter, sweet and tender cobs
- 03 **'Swift'** (extra tender sweet) (H3) 1-3-7-8-9-11-12-14-16-32
~ F1 hybrid; 2nd early. High yield; medium-sized, sweet and tender cobs
- SWEET PEPPER (*Capsicum annuum* var. *annuum* Grossum Group)**
- 98 **'Ace'** (H2) 4-8
~ F1 hybrid; productive plants produce uniform, blocky, bell-shaped, fleshy fruits that ripen from mid-green to a bright, attractive red. Reconfirmed after trial 2005
- 98 **'Ariane'** (H2) 1-4-20-21-22
~ F1 hybrid. Early-cropping and productive. Blocky, bell-shaped fruit ripen from mid-green to an attractive orange. Reconfirmed after trial 2005
- 05 **'Atris'** (H2) 20-21 **12-31**
~ F1 hybrid; plants give a good yield of long, pointed, horn-shaped, fleshy fruits with a good flavour. Fruits ripen from mid-green to an intense, deep red that darkens with maturity
- 93 **'Bell Boy'** (H2) 1-2-8-11-12-14-22-26 **35**
~ F1 hybrid; blocky, bell-shaped fruits ripen from dark green to shining red. Reconfirmed after trial 1998, 2005
- 98 **'Bendigo'** (H2) 1-14-22 **12-13-15-31**
~ F1 hybrid; an early variety. Bright shiny fruits with thick flesh
- 05 **'Calimero'** (H2)
~ F1 hybrid; uniform round, smooth, small to medium-sized fruits; good for stuffing, with a good flavour. Maturing from mid-green to bright red
- 93 **'Canape'** (H2)
~ F1 hybrid. Good shape; bright red fruits; reconfirmed after trial 1998
- 05 **'Corno di Toro Rosso'** (H2) 1-27
~ open-pollinated; later-cropping. Long, horn-shaped, very fleshy fruits that have a good flavour. Maturing from pale green to bright red
- 98 **'Cuneo Giallo'** (H2)
~ very large fruits; good for stuffing
- 05 **'Diablo'** (H2) 14
~ F1 hybrid; very productive, producing large, pointed, horn-shaped fruits with a very good flavour. Fruits ripen from mid-green to an attractive bright red
- 05 **'Friggitello'** (H2) 27
~ open-pollinated; productive plants with small, long, slim, pointed fruits. Ripening from mid-green to red; the versatile sweet-flavoured fruits have the appearance of a hot pepper and are also suitable for stir-fry and pickling
- 05 **'Gourmet'** (H2) 10
~ open-pollinated. Uniform crop of blocky, bell-shaped, fleshy fruits with a sweet flavour. Maturing from dark green to a good bright orange
- 93 **'Gypsy'** (H2) 1-4-9-10-16
~ F1 hybrid; early-cropping. High yield of long, blocky fruits with a good flavour, ripening from pale green to an attractive bright red. Reconfirmed after trial 1998, 2005
- 05 **'Mohawk'** (H2) 1-9
~ F1 hybrid. Medium-sized, bell-shaped fruits that ripen from dark green to bright yellow; good flavour. Dwarf-growing plants are well suited to growing in pots
- 05 **'Redskin'** (H2) 6-7-9-12-20-21-22
~ F1 hybrid; small to medium, blocky, bell-shaped fruits that ripen from dark green to a glossy, dark red. Compact plants give a high yield and are well suited to growing in pots
- 05 **'Sweet Spot'** (H2) 1-3-16
~ F1 hybrid; attractive, long, slim fruits ripen from pale yellow-cream to bright orange-red
- 05 **'Topboy'** (H2) 1
~ mid to late cropping; medium to large, beef tomato shape that is good for stuffing. Fleshy fruits mature from mid-green to bright yellow
- 05 **'Topepo Rosso'** (H2) 1-4
~ open-pollinated; productive, early-cropping plants. Medium-sized, beef tomato shape that is good for stuffing. Attractive fruits mature from dark green to bright red and have a good flavour
- 05 **'Topgirl'** (H2) 1-10
~ early-cropping, medium-sized, beef tomato shape; good for stuffing. Fruits mature from pale green to red; good flavour. Dwarf-growing plants, well suited to growing in pots
- 98 **'Unicorn'** (H2) 8-10
~ F1 hybrid. Nice tapering shape; good colour and yield
- 98 **'Vidi'** (H2)
~ F1 hybrid. Compact plants, with a high yield of thick-fleshed, good-coloured fruits
- TOMATO (*Lycopersicon esculentum*)**
- 97 **'Alicante'** (H2) 1-2-3-4-6-7-8-9-10-11-14-15-20-21-30 **12-14-15-31**
~ good shape; heavy crop of attractive fruits which ripen well
- 97 **'Arasta'** (H2)
~ F1 hybrid. Good shape and flavour; very bright juicy flesh
- 97 **'Cristal'** (H2) 10
~ F1 hybrid. Good shape and flavour; very high yield of large, attractive fruits with glossy skin and dark flesh
- 97 **'Golden Sunrise'** (H2) 1-2-3-5-6-7-9-10-12-13-14-15-18-20-21-25
~ later-maturing; small yellow fruits
- 93 **'Outdoor Girl'** (H2) 1-2-14-20-21-25-30
~ early. Indeterminate, round red fruits with good flavour
- 97 **'Pannovy'** (H2) 1-4-22-26
~ F1 hybrid. Thick skin; very high yield
- 97 **'Piranto'** (H2)
~ F1 hybrid. Good shape and colour; high yield of large fruits with good succulent flesh. Small calyx, average flavour
- 93 **'Shirley'** (H2) 1-2-3-4-7-8-9-10-11-12-13-14-15-16-20-21-22-26-30-31-32 **35**
~ F1 hybrid; fairly early. Uniform trusses; nice round red fruit of medium size and average flavour. Reconfirmed after trial 1997
- 97 **'Spectra'** (H2) 1
~ F1 hybrid; a later variety. Good quality; uniform and attractive greenback-free fruits
- 97 **'Tangella'** (H2)
~ small fruits, of an attractive orange colour; fairly low yield but early
- 93 **'Tigerella'** (H2) 1-2-4-10-13-14-15-18-20-21-25-31 **12**
~ interesting attractive striped fruit; quite good flavour; reconfirmed after trial 1997
- 93 **'Tornado'** (H2) 1-2-3-4-6-7-9-12-13-14-15
~ F1 hybrid; early. Bush plants, with thin-skinned juicy fruits
- 97 **'Vanessa'** (H2) 1-7-13-14-15-20-21-26
~ F1 hybrid. High yield of greenback-free, succulent fruits with very nice flavour
- 93 **'Yellow Perfection'** (H2) 1-25 **12-13-31**
~ indeterminate, uniform, round, pale, yellow fruit

Beefsteak tomato

- 03 **'Amana Orange'** (H2) 1
~ attractive orange-yellow fruit; solid flesh; very little seed. Good flavour
- 03 **'Beefsteak'** (H2) 1 **5-12-13-15-17-30-31**
~ very high yield; bright red, attractive, large fruits with solid flesh and good flavour
- 03 **'Costoluto Fiorentino'** (H2) 1-4-7-27
~ high yield; medium sized, attractive bright red, highly ribbed, succulent fruit with good flavour
- 03 **'Flame'** (H2) 1
~ low number of very large, attractive fruit; yellow flesh merging into a flame-red core. Very good flavour
- 03 **'Legend'** (H2) 4-10-32
~ F1 hybrid; early. Determinate plants; large, bright red fruit. Claimed blight resistance
- 03 **'Marmande'** (H2) 1-2-3-4-5-6-9-11-13-20-21-25-27 **12-19-31**
~ high yield; large, bright red, attractive fruits, with solid flesh and good flavour
- 03 **'Ponderosa Pink'** (H2) 1-14
~ late; vigorous, uniform plants, with attractive, large, rosy-red fruit of excellent flavour
- 03 **'White Beefsteak'** (H2)
~ low number of large, pale yellow fruits; solid flesh; very little seed

Cherry tomato

- 93 **'Gardener's Delight'** (H2) 1-2-3-4-5-6-7-8-9-10-11-14-15-20-21-30-32 **12-13-15-17-19-20-21-31**
~ indeterminate plants, producing long trusses of fruits of good flavour under glass or outside; reconfirmed after trial 1998
- 93 **'Gold Nugget'** (H2) 4-10
~ early. Compact plants, with golden yellow, oval fruits. Reconfirmed after trial 1998
- 98 **'Jenny'** (H3)
~ F1 hybrid. A tall variety; good trusses of bright orange fruits
- 98 **'Nectar'** (H3) 1-4-7.
~ F1 hybrid; early. Good shape, with trusses of bright red fruits
- 98 **'Ruby'** (H3) 10
~ F1 hybrid; early. Vigorous habit; a prolific crop of even-sized, bright red fruits on long single trusses
- 98 **'Sun Baby'** (H3) 1-4-14-15-20-21-31
~ good trusses of uniform, attractive, yellow fruits

- 98 **'Sunset'** (H3) 7
~ F1 hybrid. Good yield of bright orange fruits

- 98 **'Sweet Million'** (H3) 1-3-4-7-8-9-11-12-14-20-21-22-30-31 **35**
~ F1 hybrid. Long trusses of sweet, round, bright red fruits; good yield

- 98 **'Yellow Debut'** (H3) 1
~ F1 hybrid. Good-flavoured, medium sized fruits on long, strong, branched trusses

Plum tomato

- 04 **'Delicacy'** (H2)
~ very early, indeterminate plants. High yield of attractive, medium to small, fairly elongated, juicy fruit
- 04 **'Floridity'** (H2) 1-9-14-16-15
~ F1 hybrid; early; high yield from indeterminate plants. Attractive, small to medium, bright red, torpedo-shaped fruit
- 04 **'Grande'** (H2)
~ F1 hybrid; vigorous determinate plants, with a reasonable crop of attractive, fleshy, bright red fruit. Can be expected to grow well outside
- 04 **'Ildi'** (H2) 3-10-14-32
~ vigorous, indeterminate plants; heavy crop of small, attractive, yellow, plum-shaped fruit
- 04 **'Myriade'** (H2) 16
~ F1 hybrid; vigorous, indeterminate plants; high yield of large, uniform, plum-shaped fruit, with smooth skin and bright red flesh. Fleshy and juicy with acceptable flavour
- 04 **'Olivade'** (H2) 1-3-4-10-14-32
~ F1 hybrid; early. Plants of moderate vigour; medium-sized, attractive, red, juicy fruit with good flavour
- 04 **'Orama'** (H2)
~ attractive golden-yellow fruit from vigorous plants with strong foliage. Uniform, medium to large, juicy, fleshy fruit with good flavour
- 04 **'Santalina'** (H2)
~ very early; high yield from indeterminate plants. Attractive, bright red fruit of mixed size, but mostly small; good flavour
- 04 **'Sultana'** (H2) 6
~ early; high yield from indeterminate plants. Uniform, attractive, small to medium-sized fruit with good flavour
- 04 **'Summer Sweet'** (H2) 1-6-32
~ F1 hybrid; very early, indeterminate plants. Very high yield of attractive, medium to small, juicy fruit with good flavour

- 04 **'Sweet Olive'** (H2) 1-4-9-10-14-15-32
~ F1 hybrid; very early. Very high yield from vigorous, healthy, determinate plants. Small, red, round to plum-shaped fruits, a little difficult to pick, but of good flavour

TURNIP (*Brassica rapa Rapifera Group*)

- 97 **'Atlantic'** (H3) 1-3-7-8-16-22
~ early to mid season. Attractive flattened round roots with a purple top; very quick to mature. Reconfirmed after trial 2004
- 97 **'Ivory'** (H3)
~ uniform, attractive, long cylindrical roots, white and smooth, with a sweet flavour
- 97 **'Market Express'** (H3) 1-3-5-13-1-20-21-31
~ F1 hybrid; early. Uniform, medium size, smooth, round, pure white, shiny roots. Reconfirmed after trial 2004
- 04 **'Oasis'** (H3) 10
~ good early crop of conical white roots
- 04 **'Primera'** (H3) 10
~ uniform crop of flat-shaped roots with purple top and attractive smooth skin. Good internal flesh
- 04 **'Tiny Pal'** (H3)
~ attractive round white roots with very smooth skin
- 93 **'Tokyo Cross'** (H3) 1-6-7-14-16-22-32
~ F1 hybrid; early. Uniform, medium size, smooth, round, pure white, shiny roots; reconfirmed after trial 1997 and 2004
- 97 **'Tokyo Top'** (H3) 1
~ F1 hybrid. Uniform size; small, white, shiny, round roots

The date of the catalogue is shown in brackets after the supplier's name.

The **Award of Garden Merit** is awarded only to plants that are:

- excellent for ordinary garden use
- available
- of good constitution
- essentially stable in form and colour
- reasonably resistant to pests and diseases
- reasonably easy to grow

Intended as a practical guide for the ordinary gardener, the award is made only after a period of assessment by RHS committees. Plants of all kinds may be considered for the AGM; a complete list of current AGM plants may be found on the RHS website at:

http://www.rhs.org.uk/plants/award_plants.asp
